R

BARR'S

Autumn, 1908

Presented to the L. H. Bailey Hortorium
by the Missouri Botanical Garden, 1972.

Hyacinths

Awarded

**Five Gold Medals,
1908.**

Tulips

Crocuses

Awarded

**Silver Cups at the
Temple Flower Show, London,
1903, 1904, 1905, 1906,
1907 and 1908.**

Gladioli

Irises

Lilies

Narcissi

**And the Best Bulbs, Tubers, Etc.,
For Spring, Summer, Autumn, & Winter-flowering.**

Alphabetically Arranged for Easy Reference.

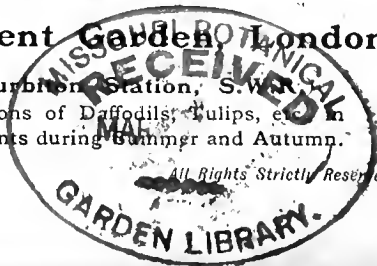

A Few Specialities and Novelties in Bulbs and Tubers, page 5.

BARR & SONS,

11, 12 & 13 King Street, Covent Garden, London.

NURSERIES:—Surbiton, Surrey (Surbiton Station, S.W.)
Visitors invited to see our Magnificent Collections of Daffodils, Tulips, etc., in
Spring, and many rare and beautiful Bulbous Plants during Summer and Autumn.

Entered at Stationers' Hall.

Barr's Pure Lawn Grass Seeds

Produce Beautiful Smooth Lawns, Tennis and Cricket Grounds, Bowling Greens, etc.

Renovate Lawns in September, after the wear of Summer.

The following Mixtures of Grass Seeds are composed of thoroughly cleaned seeds of highest quality only, and contain neither Clover nor coarse Grasses; they cannot fail to give the greatest satisfaction. The seed is sold by weight, as being the only correct method of estimating the quantity needed for a given space. The Mixtures marked * are more expensive this year, owing to the scarcity of some of the short fine-leaved grasses they are composed of.

Sow 80 lb. per acre, or 1 lb. to every 50 square yards, if the ground is required to be covered quickly, and for renovating bald patches, or where the grass is thin or poor, especially after a summer's hard wear and under trees, sow 20 to 30 lb. per acre or $\frac{1}{2}$ lb. to every 50 square yards.

Leaflet on the Management of Lawns free on application.

***Barr's New Mixture of Dwarf Evergreen Grasses for producing an Extra Fine Smooth Lawn**, a special mixture of the finest-leaved and dwarfest-growing perennial grasses, which from their fine, close, slow habit of growth and pleasing colour are best suited for forming lawns of the shortest and finest herbage, and thus greatly economising labour in mowing.

Per lb. 2s. 3d.; 20 lb. for 42s.

***Barr's "Standard" Evergreen Grasses, for Garden Lawns, Tennis Courts, etc.** This mixture is composed principally of the fine-leaved dwarf-growing grasses, all the seeds being highly cleaned and of pure and genuine quality. Per lb. 1s. 8d.; 10 lb. for 16s.; 25 lb. for 38s.

Barr's "Thames Embankment" Evergreen Grasses for Parks, Golf Links, Cricket Grounds, and Bowling Greens, a special mixture which has been found very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. Per lb. 1s.; 25 lb. for 24s.

***Barr's Special Mixture of Evergreen Grasses for sowing under Trees**, a careful selection of those grasses most suitable for sowing under trees or in shady places. Per lb. 2s. 6d.; per 10 lb. 24s.

Fine-leaved Fescue Grass (*Festuca ovina tenuifolia*), for sowing where little bulbs are to be naturalised, like Narcissi Cyclamineus, Minimus, etc.; also Scillas, Chionodoxas, Snowdrops, etc. Per lb. 3s.

Dutch Clover, Finest White. No Clover is included in the above mixtures of Grasses, as we consider a lawn should consist of Grass alone. If Clover is desired, however, it may be used at the rate of 3 to 5 lb. per acre; but it is preferable to sow the Clover separately from the Grass Seed. Per lb. 1s. 6d.

Barr's Special Lawn Phytobroma.

The best manure for Grass Lawns, Tennis Courts, Bowling Greens, Golf Links, etc.

Apply Spring and Autumn, using 2 oz. to the square yard at each application.

Barr's Lawn Phytobroma is composed of those ingredients calculated to encourage a vigorous growth of grass only, and in this respect differs from the potash manures, which are apt to stimulate clovers and coarse weeds. We can confidently recommend it for all grass-lands, as, by its use, a thicker growth and a richer colour will be obtained. It is a highly concentrated manure, and is therefore economical in use, a small quantity only being required at each application. Circular with fuller particulars sent on application.

Nett Prices—2 lb. tin, 1s.; In bags—7 lb., 2s. 6d.; 14 lb., 4s. 6d.; 28 lb., 7s. 6d.; 56 lb., 12s. 6d.; 1 cwt., 20s.

Prepaid Orders for 28 lb. and upwards sent Carriage Paid to any station in Great Britain or to any port on the Irish Coast.

BARR'S Autumn Bulb Catalogue.

1908

Five Gold Medals awarded 1908.

We have again received the highest awards this season, our exhibits having received GOLD MEDALS at LONDON, BIRMINGHAM, EDINBURGH, SHREWSBURY, and BRECON.

A few Practical Hints on Bulb Culture.

Culture for Spring-flowering Bulbs out of Doors.

Proper Condition of Soil.—Plant bulbs only when the ground is in a nice friable state, and never when the soil is wet and sticky ; in such cases plant later when the soil is in a good friable condition.

Preparing Ground for Bulbs.—After digging or trenching, the ground should be allowed to settle at least ten days before planting.

Depth to Plant.—Many amateurs commit the fault of planting too deeply, and thousands of bulbs are spoilt in this way annually (crocuses especially). A good general rule to follow is, to cover the bulb with soil once and a half to twice its own depth, but not more, *measuring the bulb* from base to shoulder. Thus a daffodil bulb measuring two inches from base to shoulder should be covered with three to four inches of soil, and a crocus bulb measuring one inch in depth with only one and a half to two inches of soil.

Proper time to Plant and Best Position.—Information on this subject is given at the heading of each family. Amateurs frequently fail with many bulbous plants through planting at the wrong season, thinking that because September is the proper time to plant crocuses, all other autumn bulbs should be planted in the same month : whereas Tulips, Anemones, Ranunculi, Ixias, Sparaxis, Early Gladioli, etc., should not be planted before October or November.

Manure for Bulbs.—All bulbs object to the ammonia in fresh stable manure, such therefore should never be used, but only well-decayed stable or cow manure ; the material from an exhausted hot-bed is a good manure, especially on light soils. The safest manures for all bulbs growing outdoors is PHYTOBROMA (price 20/- per cwt. ; 2/6 per 7 lbs.) or phosphatic basic slag (price 10/6 per cwt. ; 1/- per 7 lbs.) for heavy soils, and crushed bones (price 14/- per cwt., 1/3 per 7 lbs.) for light and sandy soils. The PHYTOBROMA should be applied at the rate of 8 cwt. per acre, or 3 oz. per square yard, early in spring, when top growth is showing ; PHOSPHATIC BASIC SLAG OR CRUSHED BONES should be put in the ground with the bulbs at the time of planting, the former at the rate of 1 ton per acre, or 7½ oz. per square yard, and the latter at the rate of 4 cwt. to the acre, or 1½ oz. to the square yard, and after planting, sprinkle on the surface of the ground SULPHATE OF POTASH at the rate of 2 cwt. per acre or ¾ oz. per square yard (price 21/- per cwt., 1/9 per 7 lbs.). Where basic slag or crushed bones are used, PHYTOBROMA may also be given at the rate of 1½ oz. to the square yard in spring, when top growth is showing. On hot dry and sandy soils, old stable manure may with advantage be used, to act as a sponge to hold moisture in the soil ; it should be dug in 15 to 18 inches deep, so as not to come in contact with the bulbs. Where bulbs are grown in quantity for cutting, plant them on a piece of ground off which a vegetable crop (potatoes by preference) has been taken. The previous manuring for the potatoes, and the working of the soil in lifting them, brings the ground into first-rate condition for bulbs, and no more manure is required.

For bulbs grown in pots 1 lb. of Phytobroma should be mixed with every bushel of soil, and a teaspoonful should be used as a surface dressing when the flower-buds are forming (*see page 94*).

Top Dressing.—Where possible, we advise a top dressing to all bulbs through the winter months with some light material such as long straw litter, cut heather, cut furze branches, etc., or cut fern bracken resting on pea sticks (cut fern used by itself lies too wet and is apt to rot the young growths). *The advantage* of this light covering is that it keeps the surface soil sweet by preventing the heavy autumnal rains from beating down the earth's crust ; it also protects any early top growth.

Lifting and Replanting.—When bulbs are lifted they should not, if possible, be replanted on the same ground, but where other bulbs or plants have previously been growing : thus, where Tulips have been growing last season, plant Narcissi this autumn, and so on.

Culture for Spring-flowering Bulbs in Pots or Boxes.

Time of Potting.—From the middle of September to the middle of October is the best month for potting Spring-flowering bulbs.

The best compost to use is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand and *not passed through a sieve*, so as to retain in the soil as much old root fibre as possible), and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of bone meal or 1 lb. of Phytobroma (*see page 94*) to every bushel of soil, which mix well together before using. *Never pot in soil that is wet or sticky.*

The pots should be carefully washed or wiped clean before using. *Never pot in dirty or wet pots.*

Good drainage should be secured by placing three or more pieces of broken crocks over the drainage hole, placing the crocks with bevelled sides uppermost, and then covering with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with crocks, and a good layer of rough fibrous loam placed at bottom of box, or a layer of leaf soil to ensure perfect drainage.

Covering the Bulbs.—The larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot, to allow of watering when the bulbs are in growth.

CULTURE OF BULBS IN POTS OR BOXES—continued.

After potting, stand the pots or boxes outside in the open, under a north wall by preference, on a firm bottom such as a bed of ashes or a gravel path to prevent the entrance of worms. Then cover with Cocoa Fibre, ashes, or old decayed leaf soil, pressing down the covering material in between the pots, which should be completely buried to a depth of 3 to 4 inches from the top. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots are plunged in the open they will require no watering.

The pots or boxes should remain plunged for a period of not less than twelve weeks, in order that the bulbs may get well rooted, after which portions may be removed indoors in succession, selecting first those which bloom naturally early. Place first in a cold frame, cool greenhouse, or cold sitting-room free from draughts, and keep partially shaded for a few days, giving water gradually. Very weak liquid manure-water may then be given once a week until they come into bloom. Those that are wanted in bloom early may, after the flower buds are advanced, be placed in a warmer temperature, such as a slow forcing-house, but this should never exceed 65° if fine blooms are desired. The plants should always be kept as near to the glass as possible and not allowed to get drawn, from an insufficient supply of light or air. On no account should bottom heat be given. A frequent mistake made in forcing bulbs is that they are removed from the plunging-bed too early, before they have made a sufficient quantity of fibrous roots. They are then at once subjected to heat, and failure is the result. It is a good plan, when bulbs are removed from the plunging-bed, to place an inverted flower-pot over them for a day or two to prevent any check from draughts to the young top growths.

Pot-Culture of Early Gladioli, Ixias, Sparaxis, Tritonias, Babianas, Calochortis, etc.

These bulbs start early into growth and therefore should not be potted up before the end of October to November. The pots should be plunged up to the rim only (not covered) in a cold frame, or under a south wall, for about three months, after which the treatment is similar to that for Spring-flowering bulbs.

Culture of Spring-Flowering Bulbs in Vases and Bowls.

Such as Hyacinths, Tulips, Daffodils, Crocuses, Soillas, Chionodoxas, Snowdrops, etc.

A charming effect can be obtained by growing spring-flowering bulbs in fancy vases and bowls, with or without drainage, by simply using our specially prepared **Fertilised Fibre, Shell and Charcoal Mixture** (3s. 6d. per bushel, 1s. per peck); the mixture is light, clean, and nice to handle, and *remains sweet* (an important matter where the vases used have no drainage holes); indeed, it is in every way preferable to soil for growing bulbs in fancy bowls and vases.

Three bulbs of *N. Queen of Spain* growing in a 4-inch "Doulton Ware" Vase.

Culture.—Fill the vase or bowl with the Fibre, Shell and Charcoal Mixture up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil, just covering them. After planting, plunge the bowls or vases out of doors on a bed of cocoa fibre or ashes, and cover entirely with cocoa fibre, leaving them thus for about 12 weeks; they may then be transferred to a sunny window of a cool airy sitting-room (selecting a window that gets the morning sun) or to a cool greenhouse placed close to the glass, where they may be flowered in the same way as pot Hyacinths; they should be kept as near the glass as possible, and given sufficient light and air to prevent the foliage becoming drawn. When the flower buds are advanced, they may be removed to a warmer temperature, such as a slow forcing-house or a warmer sitting-room, still being given as much light as possible. No bottom heat must ever be given, neither should they be placed in too warm a temperature until the flower buds are well developed.

Where it is not convenient to place the bowls outside they may be plunged in cocoa fibre in a cold frame, or cool airy cellar, giving sufficient water after planting to make the fibre mixture moderately damp. For the first week or two after planting, water must be given sparingly, sufficient only to keep the fibre mixture damp enough to encourage root action; as soon as the bulbs are well rooted, water should be given more freely, the fibre mixture being then kept quite moist. The fibre must never be allowed at any time to become dry, even for a day, or the bulbs will suffer.

SPECIAL FANCY VASES AND BOWLS for growing Daffodils and other bulbs in.

We have had special little fancy vases made for us by Messrs. Doulton for the above-named purpose. The vases are of elegant shape, of a neutral art drab shade, and without drainage holes, thus saving the use of saucers. They will be found most useful for growing Spring-flowering bulbs in, either for table decoration or the greenhouse. During Summer they may be used for table decoration planted with Pansies or such low-growing hardy flowers, or for standing little pot-plants in.

Barr's "Doulton-Ware" Bulb Vases (as illustrated):—2½ in. diameter, -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia., 3/- each.

Fancy Decorated Japanese Bowls:—5 in. diameter, -/10; 6 in. dia., 1/3; 7 in. dia., 1/9; 8½ in. dia., 3/-; 9½ in. dia., 4/-; 10½ in. dia., 6/-; 12 in. dia., 8/6 each.

Barr's Fertilised Fibre, Shell, and Charcoal Mixture, for growing bulbs in Vases, Bowls, Jardinets, etc., 3/6 per bushel; 1/- per peck (bags free).

Barr's Famous "Covent Garden"

Collections of Bulbs.

These Collections are not subject to Cash Discount, the prices being strictly nett.
In the case of Prepaid Orders, however, all Collections are delivered Carriage Paid.

(After November 1 we may find it necessary to make slight changes in the Collections.)

(A) Barr's 21/- Collection of Bulbs for Forcing.

Contains over 300 Bulbs of fine quality, as follows:

12 Choice Named Hyacinths	25 Sweet-scented Single Jonquils	6 Single Tulip, Cottage Maid
12 Early White Roman Hyacinths	3 Daffodil Golden Spur	6 " " Kelzerskroon
3 " Blush Italian	3 " Henry Irving	6 Double Tulip Tournesol
3 " Primrose Italian Hyacinths	3 " bicolor Horsfieldii	50 Splendid (Named) Crocuses
6 Double Roman Narcissus	3 " Queen of Spain	25 Scilla sibirica
6 Paper Whites "Early Snowflake" Narcissus (Soleil d'Or"	3 " Telamonius plenus	50 Elwes' Giant Snowdrop
3 Polyanthus Narcissus "Grand	12 " poeticus ornatus	12 Chionodoxa Lucilla
3 " " Grand Monarque	12 Single Tulip, Early Scarlet, "Duc Van Thol"	12 " sardensis
	6 " " Chrysolora	12 Allium neapolitanum
		12 Friesia mixed hybrids

(A) Barr's Collections of Bulbs for Forcing, 42/-, 63/-, 84/-, and 105/-,

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

(B) Barr's 21/- Collection of Bulbs for the Greenhouse, Sitting-Room, etc.

Containing 300 Bulbs of fine quality.

Arranged for those who prefer a few sorts only of easily cultivated Winter- and Spring-flowering Bulbs.

20 Choice Named Hyacinths	3 Daffodil Emperor	6 Single Tulip Van Vondel
6 Early Whites Roman Hyacinths	3 " bicolor Empress	6 Double Tulip Tournesol
6 Paper White "Early Snowflake" Narcissus	3 " Queen of Spain	100 Splendid Crocuses (Named)
3 Polyanthus Narcissus Grand Monarque	3 " Telamonius plenus	25 Scilla sibirica
3 " " Grand Soleil d'Or	6 " poeticus ornatus	12 Chionodoxa Lucilla
25 Sweet-scented Single Jonquils	6 Single Tulip Chrysolora	12 " sardensis
3 Daffodil Golden Spur	6 " " Dusart	25 Elwes' Giant Snowdrop
	6 " " Princess Marianne	12 Milla uniflora

(B) Barr's 12/6 Collection of Bulbs for Greenhouse, etc.

Containing about half the quantity of Bulbs as in the 21/- Collection.

(B) Barr's Collections of Bulbs for Greenhouses, etc., 42/-, 63/-, 84/-, and 105/-,

Containing equally liberal assortments of suitable Bulbs of fine quality, as in the 21/- Collection.

For directions as to potting and treatment of bulbs before they are brought into the greenhouse, or forcing-house, see page 1.

(C) Barr's 21/- Collection of Bulbs for the Flower Garden.

Containing 600 Bulbs of fine quality, most suitable for outdoor decoration.

25 Hyacinths, Barr's Rainbow Mixture, Large-flowered	25 Single Tulips, Barr's Rainbow Mixture	12 Blue Grape Hyacinth
6 Polyanthus Narcissus, mixed	25 Double Tulips, Barr's Rainbow	10 Allium Moly, yellow
5 Daffodil Queen of Spain	50 Crocus, large yellow	25 Star of Bethlehem
5 " princeps	50 " " purple	25 Wood Hyacinths, mixed
5 " incomparabilis Beauty	50 " " white	18 Milla uniflora
5 " Stella	50 Snowdrops	25 Summer Snowflakes
5 " Barrii conspicuus	10 Scilla sibirica	12 Fritillaria, mixed
5 " Leedsii Minnie Hume	12 Chionodoxa Lucilla	25 Spanish Irises, mixed
5 " poeticus ornatus	12 " sardensis	12 English Irises, mixed
12 Jonquill Daffodil "Rugulosus"	24 Winter Aconites	50 Anemone, Large-flowered, Single, mixed

(C) Barr's 12/6 Collection of Bulbs for Flower Garden,

Containing half the quantity of the Bulbs enumerated in the above 21/- Collection.

(C) Barr's Collections of Bulbs for Flower Garden, 42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

(D) Barr's "Woodland" 21/- Collection of Bulbs

For Naturalising in Woodlands, Orchards, Wild Gardens, &c.

Containing 800 suitable Bulbs of fine quality.

200 Daffodils, in 10 named varieties	50 Wood Hyacinths, mixed	12 Snakeshead Fritillaries
25 Cottage Tulips, mixed	75 Elwes' Giant Snowdrops	12 Camassia esculenta
50 Winter Aconites	25 Summer Snowflakes	3 Crown Imperials, mixed
50 Star of Bethlehem, white	25 Dog's-Tooth Violets, mixed	3 Lillium candidum (<i>Madonna Lily</i>)
50 Blue Grape Hyacinths	15 Blue Apennine Anemones	3 " umbellatum, mixed
125 Crocuses, mixed	50 Milla uniflora (<i>Triteleia</i>)	3 " pyrenaicum, yellow
	25 Allium Moly, yellow	

(D) Barr's 12/6 "Woodland" Collection of Bulbs,

Containing about half the quantity of the Bulbs enumerated in the above 21/- Collection.

(D) Barr's "Woodland" Collections of Bulbs, 42/-, 63/-, 84/-, and 105/-,

Containing an equally liberal assortment of suitable Bulbs of fine quality, as in the 21/- Collection.

For hints on naturalising Bulbs and how to plant in grass without spoiling the turf, see pages 9 and 10.

(E) Barr's "Rock Garden" 21/- Collection of Bulbs

Consisting of charming little

Subjects for Naturalising on Rockwork, Banks, &c.,

where they will soon establish themselves and form a delightful picture.

For full descriptions, see body of Catalogue.

12 Allium Moly	6 Crocus biflorus	6 Daffodil nanus
12 " neapolitanum	12 " Suslanus	12 Ornithogalum umbellatum
6 " triquetrum	3 Corydalis bulbosa	splendens
6 Anemone fulgens	12 Erythronium dens-canis, mixed	6 Puschkinia libanotica compacta
12 " apennina	6 Fritillaria meleagris, mixed	6 Romulea speciosa
3 Bloomeria aurea	25 Galanthus Elwesii	12 Scilla sibirica
12 Brodiaea grandiflora	6 Hyacinthus amethystinus	12 " bifolia
18 Chionodoxa Lucillae	3 Iris persica	6 " hispanica aperta
12 " sardensis	3 " reticulata	6 " " alba
6 Crocus asturicus	12 Leucojum vernum carpathicum	6 Sternbergia lutea major
6 " sativus	12 Milla uniflora	2 Tropaeolum polyphyllum
12 " speciosus	6 Muscari Heavenly Blue	6 Tulipa persica
6 " aureus striatus		25 Winter Aconites

(E) Barr's "Rock Garden" 12/6 Collection of Bulbs,

Containing about half the quantity of Bulbs as in the 21/- Collection.

(F) Barr's Choice "Alpine Garden" 21/- Collection of Bulbs.

Consisting of choice little

Subjects in Bulbous Plants, suitable for the Alpine Garden.

3 Anemone Hortensis "Scarlet Gem"	6 Crocus Suslanus	3 Daffodil Bulbocodium
3 " blanda	6 " Tommasinianus	clitrimum
3 " ranunculoides	3 Erythronium californicum	3 " cyclamineus
3 " nemorosa bracteata fl. pl.	3 " Hendersoni	3 " minimus
3 " " Robinsoniana	3 Fritillaria armena	3 " triandrus albus
3 Brodiaea Murrayana	3 " aurea	3 Puschkinia libanotica
3 Calochortus, mixed (Butterfly Tulips)	6 Galanthus Ikarisae	3 Romulea Clusii
3 " amabilis	3 " plicatus	3 " speciosa
3 Chionodoxa gigantea	6 Hyacinthus amethystinus	3 Scilla sibirica taurica
3 Colchicum montanum	3 Iris alata	3 " " alba
6 Crocus speciosus	3 " reticulata	3 " Italica
6 " Tournefortii	3 " " Histrioides	3 " autumnalis japonica
6 " zonatus	3 " tuberosa.	3 Sternbergia lutea major
6 " Imperati	6 Leucojum vernum carpathicum	3 Tropaeolum polyphyllum
	6 Muscari Heavenly Blue	3 Tulipa Clusiana
	6 " botryoides album	3 " persica

(F) Barr's Choice "Alpine Garden" 12/6 Collection of Bulbs,

Containing about half the quantity of Bulbs as in the 21/- collection.

A Few Fine Novelties and Specialities In Bulbs and Tubers, Etc., for 1908.

ADONIS

- amurensis**, having a graceful fern-like foliage, and bearing large single yellow flowers each—s. d
during February and March, ht. 1 ft. per doz. 10/6 1 0
" **fl. pl. var. Kikusaki**, a lovely new and rare variety from Japan,
producing handsome double flowers of a clear self-yellow, ht. 1 ft. 1 6
" **fl. pl. var. Sandasaki**, another rare and new Japanese form. flowers
opening yellow with a green centre developing into a green flower, then
passing to yellow, ht. 1 ft. 3 6

AGAPANTHUS

- St. Pauli**, a fine African Lily, bearing on stems 2 to 2½ ft. high large umbels of pure white
flowers about the size of *A. Mooreanus*; a charming plant for pots or tubs, etc....per doz. 48/- 4 6
Weillighi, a handsome new species of **The African Lily**, with fine heads of lavender-coloured
flowers having indigo-blue line up the petals and a broad indigo-blue margin, ht. 3 ft.
per doz. 21/- 2 0

- ALSTRÖMERIA aurantiaca major**, a fine improved form of the old **A. aurantiaca**,
flowers large, brilliant deep orange and scarlet, centre petal flaked maroon on gold; a showy
hardy plant for sunny borders, flowers valuable for cutting, ht. 3 to 4 ft.per doz. 7/6 0 8

AMARYLLIS

- Belladonna elata**, a handsome variety of the popular **Belladonna Lily**, growing taller
with dark stems and flowers of a deep rose shade; it also blooms a month earlier and is a
valuable plant for establishing at the foot of a south wall or for pot cultureper doz. 24/- 2 3

ANEMONE

- "St. Brigid,"** an extra fine strain of these lovely Poppy Anemones, flowers very large,
mostly semi-double, with finely divided petals, and of the most brilliant and varied shades
of colour, all having a handsome blue-black central boss; very graceful in habit, ht. 1 ft.
per 100, 10/6; per doz. 1/6 —
Beauty of Athens, a very pretty variety of the **Starry Windflower** (*A. hortensis*),
with large flowers ranging in shade from brilliant earmine to cherry-rose and bluish,
ht. ¾ ft.per doz. 7/6 0 8
Pink Pearl, a lovely new variety of the **Single Poppy Anemone** (*A. coronaria*), having
large flowers, silvery rose with black central boss surrounded by a white ring,
ht. 1 ft.per 100, 55/-; per doz. 7/6 0 8

- ARUM aristatum**, a dainty little **Dragon Arum** with brilliant red spathe and blackish
spadix, pleasantly scented; this Arum, like the *Monarch of the East*, may be flowered in a
dry state without the aid of soil or waterCrop failed

- ASTILBE chinensis Davidii**, a very handsome new Chinese hardy border perennial,
producing large plumes of handsome rich crimson-purple flowers with violet anthers, ht. 3 to
5 ft. FIRST-CLASS CERTIFICATE R.H.S., August 1902per doz. 10/6 1 0

AUBRIETIA (Rock Cress)—Beautiful New Varieties.

- Bridesmaid**, raised at our Surbiton Nurseries, large flowers of a most beautiful soft blush,
a delightful new shade; a gem for border or rock gardenper doz. 7/6 0 9
Lavender, a beautiful new variety of a lovely clear lavender-blue shade „ 10/6 1 0
Mrs. E. M. Crosfield, a fine new variety raised by E. M. Crosfield, Esq., flowers large,
of a rich violet-blue shade, very fineper doz 15/- 1 6
Prichard's A1, large deep violet flowers. AWARD OF MERIT R.H.S. „ 7/6 0 9
tauricola alba, very beautiful variety of dwarf compact habit, flowers opening white
and passing off a pretty shade of silvery lilac, ht. 3 in.per 100, 42/-; per doz. 5/6 0 6

- CALOCHORTUS Venustus—Eldorado strain**, a fine strain of the lovely *Butterfly
Tulips*. (See page 20.)

COLCHICUM

- speciosum album**, a grand Meadow Saffron with very large snowy white flowers, rare
and beautiful 5/6 & 7 6

- CROCUS**, Rare and Beautiful Species, autumn, winter, and spring-flowering, gems for the
rock garden and pots. *Special descriptive list on application.*

CYRTANTHUS

- angustifolius grandiflorus**, the *finest of all the Cyrtanthi of the Monella section*,
and a handsome greenhouse plant for autumn flowering; it produces spikes 1½ to 2 ft. high,
bearing umbels of 12 to 15 flowers, of a brilliant orange-scarlet 5 6

CYRTANTHUS—continued.

each—s d

- Marian**, an elegant hybrid between *C. lutescens* and a form of *C. angustifolius*, producing freely spikes a foot long, bearing fine heads of curved flowers yellow and bright red; a fine greenhouse plant, ht. 12 to 15 in. AWARD OF MERIT R.H.S., April 5th, 1904 3 6
- sanguineus glaucophyllus**, flowers nearly 4 in. across with broad recurving petals, colour sparkling salmon-scarlet with golden anthers, interior of flower lined blood-crimson; a grand varietyper doz. 72/- 6 6

EURYCLES

- Cunninghami (The Brisbane Lily)**, a handsome stove or warm greenhouse bulbous plant allied to the *Pancratium*, with handsome broad foliage and large heads of pearly white flowers, ht. 1 ft. Pot up in February and place in bottom heat, giving abundance of water while the plants are in growth.....per doz. 21/- 2 0
- sylvestris** (*syn. australasica amboinensis*), the **Amboyna Lily**, a handsome plant for warm greenhouse or stove, having a broad heart-shaped foliage and a large umbel of tubular pearly white flowers, ht. 1 to 2 ft.per doz. 12/6 1 3
- ” ” ” **extra strong bulbs** ” 21/- 2 0

FREESIA

- Chapmanii**, a beautiful new hybrid Freesia, a cross between *F. aurea* and *F. refracta alba*, bearing elegant racemes of flowers nearly the size of *F. refracta alba*, varying from primrose to canary with golden shading and brilliant orange blotch, delicately fragrant.....per doz. 30/- 2 9
- refracta alba**, The true Pure White variety. See page 29.
- Tubergeni** (*F. refracta alba* × *F. Armstrongi*), a lovely new hybrid with flowers the size of *Freesia refracta alba*, of a delicate rose-lilac shade with white throat and base of tube bronzy gold, deliciously scentedper doz. 36/- 3 3
- Tubergeni “Amethyst,”** flowers a charming soft shade of lavender or mauve, very beautiful. AWARD OF MERIT R.H.S., 1907 3 6

GERBERA Jamesoni (Barborton Daisy), a very handsome plant from South Africa, bearing large showy flowers, resembling giant daisies, colour fiery scarlet. Suitable for very hot sheltered sunny gardens, or may be grown as a cool greenhouse plant.

- per doz. 10/6 & 15/-; 1/- & 1 6
- ” ” ” **Extra strong plants**, ” 24/- & 36/-; 2/6 & 3 6
- ” ” ” **Smaller plants**, ready for potting on, per doz. 7/6 0 9

GLADIOLUS

- primulinus (Maid of the Mist)**, a rare and lovely species found growing in the neighbourhood of the Victoria Falls on the Zambesi River, where the spray at times completely covers it. The flowers, which are of a beautiful soft primrose-yellow, are of quaint hooded form and borne on spikes 2 to 3 ft. high. Easily grown in pots in a cold greenhouse or out of doors in warm localities; while in full growth it should have a liberal supply of water.....per doz. 48/- 4 3
- princeps**, the largest-flowered and perhaps the most showy Gladiolus ever raised. Flowers of great size, very open, and beautifully formed, brilliant deep scarlet with white stripe down centre of petal; remarkably effective in the flower-border per doz. 10/6 1 0
- salmeoneus (Baker)**, a fine distinct species from Griqualand East, found growing at an altitude of 3,000 to 4,000 ft. It produces spikes 18 in. high with showy salmon-red flowers 2 in. longper doz. 21/- 2 0

GLORIOSA Leopoldi, a fine new Glory Lily from the Congo, producing an abundance of beautiful self-golden-yellow flowers; a grand warm greenhouse climber 3 6

HELONIOPSIS breviscapa, a charming little plant introduced by us from Japan, producing out-of-doors in February and March sturdy little spikes 4 in. high studded with dainty white flowers passing off rose; it delights in a half-shady situation. AWARD OF MERIT R.H.S. See coloured plate in “The Garden,” July 22nd, 1905per doz. 15/- 1 6

HEPATICA

- angulosa alba**, a pure white-flowered form of the handsome *H. angulosa* and a valuable addition to this lovely family. We obtained an AWARD OF MERIT for this plant from the R.H.S.per doz. 10/6 1 0
- Double White**, a rare and beautiful variety with pure white very double flowers. FIRST-CLASS CERTIFICATE R.H.S. 5 6

HYMENOCALLIS Amancæs, the Golden-Yellow Peruvian Daffodil, a rare and handsome greenhouse bulbous plant, ht. 1½ to 2 ft.per doz. 36/- 3 6

IRIS

- pur-sind**, a pretty free-blooming hybrid of *I. persica purpurea* and *I. Sindjarensis*, producing dwarf plants covered with rosy purple flowers shaded blue, ht. 4 to 5 in.; charming in pots or on rockworkper doz. 15/- 1 6

each.—s d

OXALIS Imbricata fl. pl., a charming South African species of **Wood Sorrel**, producing during July and August bright rose-coloured flowers as double as a Rose, ht. 4 in. Suitable for pot-culture in cold greenhouseper doz. 12/- 1 3

PEONY

albiflora, The Bride, undoubtedly the finest single white Pæony yet raised. The flowers are large, of a snowy white with golden anthers, and resemble huge white **Water Lilies**; it is also a wonderfully profuse bloomer and free grower, ht. 3 ft. 5 6

lutea, beautiful new species from Yunnan mountains, habit of growth resembles somewhat a Tree Pæony, flowers rich butter-yellow, a sterling novelty of great beauty.....*young plan's* 10 6

PHÆDRANASSA Carmioli (Baker), a beautiful and showy species of the **Queen Lily** from Costa Rica, having a Eucharis-like growth and bearing handsome umbels of flowers, carmine-red tipped green, ht. 1 ft.; easily grown in a cold greenhouse or frame, per doz. 30/- 2 9

PRIMROSE Evelyn Arkwright, a superb form of our native Primrose, with flowers as sweetly fragrant and of the same lovely shade, but as large as a five-shilling piece. AWARD OF MERIT R.H.S. 3 6

RAMONDIA pyrenaica alba, a beautiful white-flowered form of this lovely alpine; suitable for shaded crevices 3 6

SCHIZOCODON soldanelloides, a lovely Japanese alpine creeper with persistent evergreen bronze foliage, and producing dainty bright crimson fringed flowers during March and April, ht. 3 in.; a lovely plant, delighting in peaty soil and shade... 3 6

SHORTIA uniflora, a charming Japanese alpine of spreading habit, bearing in early spring bright rose-coloured flowers resembling in form *Soldanella alpina*, ht. 3 in., *rare*; for peat and sand, in shade..... 3 6

SPIRÆA—Two lovely New Varieties, being crosses between *Spiræa chinensis* and *japonica compacta multiflora*; valuable acquisitions both for out-door or greenhouse decoration. They are both good forcers. Awarded a GOLD MEDAL by the R.H.S. at Holland House Show 1904.

Peach Blossom, a very graceful plant well furnished with erect plumes of the most lovely delicate flesh-rose flowers, borne on long flower stemsper doz. 17/6 1 8

Queen Alexandra, a handsome plant of elegant spreading habit and large flower plumes of a pretty light rose (or when forced a very pale rose)per doz. 17/6 1 8

SPIRÆA Kamschatica rosea, bearing large heads of pale rose-coloured flowers; a valuable acquisition for the flower border and waterside, ht. 4 to 5 ft. 1 6

TULIPS—New Cottage Tulips and species. Mostly May-flowering.

Fireblaze (3), very large long flower, canary-yellow heavily flushed crimson-scarlet at margin, and developing to a fiery scarlet with orange shading, very showy, ht. 20 in.....per doz. 7/6 0 8

Golden Bronze (4), flower large of beautiful saucer form, colour glossy golden-bronze shaded mahogany towards centre, ht. 26 in.per doz. 25/- 2 3

Inglescombe Yellow (4), may be called a **Yellow Darwin Tulip**, large globular flowers of perfect form of a glossy canary-yellow, a remarkably beautiful flower, ht. 18 in. AWARD OF MERIT R.H.S., May 15th, 1906per doz. 12/6 1 3

Kaufmanniana, Extra selected varieties, fine selected forms of this beautiful Tulip, flowers large, white, variously marked with shades of red.....per doz. 15/- 1 6

Lady of the Lake (2), a most lovely Tulip, flower a delicate pale lemon shaded primrose, very chaste, ht. 21 in.per doz. 25/- 2 3

Louis XIV. (3), globular flower of immense size, with broad petals rich purple heavily flushed golden-bronze at margin, inside golden-bronze shading to bronzy purple, very tall and stately; a remarkably handsome flower, ht. 26 in. CERTIFICATE OF MERIT R.H.S., May 22nd, 1907per doz. 32/6 3 0

Mrs. Kerrell, a flower of elegant form with pointed petals, the three outer ones slightly reflexing, colour a beautiful light rose with delicate amber tinge, centre white bordered electric-blue, *very scarce*per doz. 36/- 3 3

Quaintness (4), large handsome long flowers, inside shaded mahogany on a dark golden ground, outside flushed deep rose, very distinct. AWARD OF MERIT R.H.S., 1905 4 6

Scarlet Emperor (3), a very fine bold flower of a brilliant glowing scarlet, with rich clear yellow centre and black anthers, a remarkably handsome Tulip. FIRST-CLASS CERTIFICATE R.H.S., May 17th, 1904per doz. 21/- 2 0

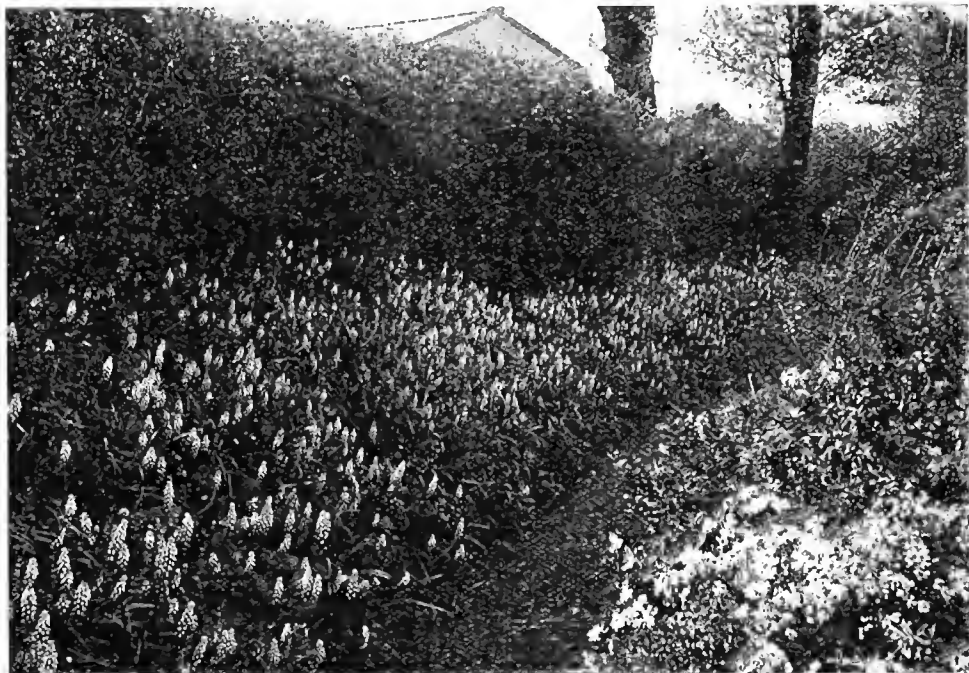

Walter T. Ware, a grand Tulip and the richest deep golden of all, flowers globular, with broad petals, the three outer ones reflexing at the top, very beautiful. A wonderful lasting Tulip, ht. 18 in. AWARD OF MERIT R.H.S., May 15, 1906.....*only a few bulbs for sale* 21 0

TULIP, Parrot, new break of colour.

Sensation, a remarkably handsome variety and a great novelty, flowers very large, with deeply cut and curling petals, heavily blotched and striped blackish purple on a white ground, quite a new colour in Parrot Tulips. *Very scarce* (only a few bulbs in existence) 30 0

Hardy Bulbs & Plants.

For extensive planting in Shrubberies, Wild Gardens,
Woodlands, Grass Lands, etc.

MUSCARI "HEAVENLY BLUE" ESTABLISHED ON A HEDGE BANK AT OUR SURBITON NURSERY.

A Few Remarks on Naturalising Bulbs in Grass, etc.

This fascinating phase of gardening deserves more attention than has hitherto been bestowed upon it. No sight is more delightful than the fresh brightness of spring-flowers growing freely in grass land or lending colour to woodland walks, hedgerows, and ditches, here and there nestling at the foot of trees, or establishing themselves on sloping banks.

For naturalising in grass spring flowers are especially suitable, as they bloom and are over before the grass grows tall enough to hide their beauty. Amongst our spring-flowering bulbs there are many kinds which refuse to grow in cultivated borders, but when planted in grass, where they enjoy a cooler and more even temperature, they soon become established, and multiply freely until a regular colony is formed which greatly adds to the charm of the landscape.

All formality of arrangement should be avoided, the bulbs being scattered freely from the hand and planted where they fall. Large irregular breaks of one kind of bulb should be made in order to obtain the finest effect.

In planting under trees select spots where the soil is deepest and where the drip is least.

Those whose gardens are of limited size might make them very beautiful in spring, by utilising the fringes of their lawns and any grassy mounds or shady shrubbery walks for such spring favourites as Daffodils, Anemones, Scillas, Crocuses, Chionodoxas, etc., reserving the borders for summer- and autumn-flowering herbaceous plants.

In large gardens and parks ample opportunities are afforded for naturalising spring-flowering bulbs, and very beautiful results may be attained in this way.

In planting bulbs *in grass* Barr's Bulb Planter (see page 93), should always be used. It cuts out a clean piece of turf, leaving a hole to receive the bulb, and on making the second cutting clears itself of the first piece of turf, which lies ready at hand for covering the bulb. This handy implement saves an immense amount of time, and does not, as with an ordinary dibber, leave a hard resting-place for the bulb, while by its use the grass is not in the least disturbed. Planting should not take place while the ground is hard, but after the first autumn rains.

Among the many gems which lend themselves to wild gardening and naturalising, we would specially mention the following :—

Wood Anemones (see page 16), including the exquisite *Anemone Robinsoniana* and the deeper blue and slightly taller *Anemone apennina* and *blanda*; one must see these lovely flowers nestling in grass or against the roots of large trees, to appreciate them fully.

Alliums (page 12). Amongst these we would mention *Allium Moly*, with its bright yellow flowers, thriving anywhere; also the graceful little *Allium neapolitanum*, so useful for shady corners.

Anthericum (see below), very graceful and decorative in grass.

Asphodelus luteus and **ramosus** (page 11), two fine plants for naturalising in grass.

Ornithogalum (page 67), flowering freely anywhere, and producing a very beautiful effect when dibbled in on banks and blended with Tulips, Muscaris, etc.

Tulips. These may often be naturalised on banks where, in the same locality, if planted on the level they die out. *Tulipa sylvestris* and the dainty little *Tulipa persica* may be naturalised almost anywhere; the **May-flowering Cottage Tulips** (page 81) should be freely used for naturalising, especially *Picotee*, *Parisian Yellow*, *macrospila*, *Gesneriana*, *Bouton d'or*, etc. Plant at least 6 to 9 inches deep. All Tulips thrive best in partial shade and where sheltered from keen winds.

Wood Hyacinths (Late Scillas) (page 71) should be planted freely in shady walks; they soon make themselves at home and seed plentifully, with the result of much beautiful variation in form and character. Under pine and fir trees they may be naturalised with success.

Fritillaries (page 29). The purple and white Snakeshead Fritillaries (*F. meleagris*) are found growing wild in a few districts in England, and thus seen form a charming picture, full of grace and beauty. For shady corners they will be greatly appreciated, also when naturalised in grass.

Dog's Tooth Violets (*Erythronium dens-canis*, page 28) are lovely little subjects for shady places where the grass is not too rank.

Crocuses. In grass the bright fresh colours of spring Crocuses contrast charmingly with their carpet of green. The beauty of *C. speciosus* (page 25) in September must strike every observer, while *C. Tommasinianus* (page 25) produces a lovely effect in February and March.

Chionodoxas (page 21) are amongst the most beautiful of early blue flowers, and should be largely used where the grass is kept short and not allowed to grow too coarse. *C. Lucilie* and *sardensis* are followed by the beautiful *C. grandiflora* and *Tmolusii*.

Scillas, early-flowering (page 70), such as *sibirica*, *sibirica alba*, *bifolia*, *autana*, etc., all charming little subjects for naturalising.

Muscari (page 64) "**Heavenly Blue**" may be termed the **QUEEN OF BLUE FLOWERS**; for a distant effect, massed on grassy banks or grouped for colour, it has no equal. *M. botryoides caeruleum* and its varieties, flowering earlier than *Heavenly Blue*, are also charming little subjects to naturalise.

Daffodils. For these favourite flowers, we refer readers to our **Daffodil Catalogue**.

System of Planting, Arranging, etc.

In the grouping of Bulbs for naturalisation avoid anything approaching formality, and let the arrangement be a free and unconventional one. A good plan is to scatter the bulbs loosely from the hand and plant them where they happen to fall, thus forming irregular sweeps and breaks of colour here and there.

THE SYSTEM OF PLANTING.—For planting bulbs in grass we have had a **Bulb Planter** specially made, and by its use much time is saved and the turf is not spoilt. *Particulars* as to its use are given on page 9. In shrubby borders and in hard ground our special **Bulb Digger** should always be used, the planting taking place after the first autumn rains; a hole is made the requisite depth, some fresh soil put in, and then the bulb inserted, after which the hole is filled up.

IN SELECTING POSITIONS the first consideration should be what best suits the subjects to be planted: too often shade-loving plants are found struggling for existence in full sun, and *vice versa*. In the following pages at the heading of each family we indicate as far as possible its cultural requirements. In planting beneath trees select spots where the soil is deepest and the drip least, which means avoiding the main branches or arms.

CUTTING OF GRASS.—It is advisable that this be done as late in September as possible, so as to ensure it being short at the time the bulbs flower. In meadowland Spring-flowering bulbs in no way affect the hay crop, which may be cut at the usual season.

§ indicates those flowers which will thrive in shady places, under trees, on shady banks, etc., or may be planted in the open border.

* indicates those bulbs, etc., which are essentially wood plants, and should only be grown in shady situations.

For full descriptions see *body of Catalogue*.

BULBS AND TUBERS, &c.

FOR ALL SEASONS AND CLIMATES.

ALPHABETICALLY ARRANGED FOR EASY REFERENCE.

In the following pages we give descriptions, as far as space permits, of the various Bulbs, etc., with general notes as to their cultural requirements. The larger illustrations are mostly reproductions, on a greatly reduced scale, of photographs taken at our **Surbiton Bulb Nurseries**.

Great care is taken in the selecting of our Bulbs, these being drawn from the **best bulb farms only**. High-class Daffodils and Tulips, etc., also many little rare and beautiful bulbous plants, *we are ourselves large growers of*.

Those bulbs and tubers marked thus **x** ripen late and are sent out from the middle of October to March. All other bulbs, etc., are ready for despatch in September. Orders which embrace earlier and later ripening bulbs, etc., will be executed therefore in two parts.

x ABOBRA viridiflora, an elegant *scarlet-fruited* half-hardy perennial climber; plant outdoors in Spring and lift the tubers in Autumn, storing them in dry sand in a cool place away from frostper doz. 5/6 ^{each—s. d} o 6

x ACHIMENES, these make charming pot-plants for the greenhouse, and are very decorative with their brilliantly coloured elegant flowers; pot in rich light soil in Spring and start in a gentle bottom heat.

3 each of 8 distinct varieties, 8/-; 1 each of 8 distinct varieties, 3/-

Beautiful Hybrids, mixed, containing a great variety of charming colours

per 100, 10/6; per doz. 1/6 —

tubiflora (*syn. Dolichodeira*), a valuable but little known pot-plant for greenhouse, bearing trusses of long tubular white flowers which have a delicious fragrance ...per doz. 5/6 o 6

ACONITE—Winter. See **Winter Aconite**.

ADONIS

pyrenaica, a handsome plant, producing in spring large golden yellow flowers; prefers a shady situation, ht. 1 to 1½ ft.per doz. 5/6 o 6

vernalis, bearing large star-shaped clear yellow Anemone-like flowers, April and May, charming when massed on rockwork or borders; it thrives in ordinary soil, ht. ¾ ft.

per 100, 25/-; per doz. 4/6 o 5

amurensis. See *Novelty List, page 5*.

„ **fl. pl. Kikusaki.** See *Novelty List, page 5*.

„ **fl. pl. var. Sandasaki.** See *Novelty List, page 5*.

AGAPANTHUS (African Lily), valuable subjects for growing in tubs and pots, either for greenhouse or summer decoration in porches, on verandahs, terrace walks, and lawns, etc. They are also very effective planted out by streams, lakes, and ponds. During severe winters they should be covered with light litter or long manure, or in very cold climates lift the tubers in October and store in dry soil, replanting them in March. This plant is a gross feeder, and likes a rich soil with plenty of moisture while in growth.

umbellatus, handsome umbels of blue flowers, ht. 3 ft.per doz. 5/6 o 6

„ **flore-pleno**, a very handsome variety with fine double blue flowers, ht. 3 ft.per doz. 10/6 1 o

„ **albus**, producing handsome umbels of flowers ranging from white to white shaded blue, ht. 3 ft.per doz. 5/6 o 6

„ **fol. variegatis**, foliage handsomely striped, flowers light blue, ht. 3 ft. 2 o

„ **Mooreanus**, small blue flowers in graceful umbels, ht. 2 ft., per doz. 4/6 o 5

„ **St. Pauli.** See *Novelty List, page 5*.

„ **Weillighi.** See *Novelty List, page 5*.

x ALBUCA, handsome Cape bulbs flowering in June; plant out of doors under a south wall in Spring, and lift the bulbs in Autumn, or pot up in Autumn for greenhouse culture.

canaliculata, having handsome trusses of almond-scented *golden-yellow* flowers, ht. 1½ ft. ... 2 6

fastigiata, producing handsome trusses of *white* and *green* flowers, ht. 1½ ft. ...*crop failed*

Nelsoni, a lovely species, producing handsome spikes of almond-scented pure white flowers, with brown stripe down petal (under glass *pure white*), ht. 3 ft.per doz. 7/6 o 8

ALLIUM, a decorative and showy family of hardy Spring- and Summer-flowering bulbs, valuable alike for borders or rockwork and for naturalising in woods, etc. *A. neapolitanum* is easily forced, and the cut blooms are extensively used for vases and table bouquets.

acuminatum, with beautiful soft rose-lilac-coloured flowers in umbels, ht. 1 ft., per doz. 1/6 o 2

„ **Murrayanum**, bearing umbels of bright rosy violet flowers, ht. 1 ft. „ 2/6 o 3

ALLIUM—*continuea*.

Many other species of Alliums can also be supplied.

* **ALSTRÖMERIA**, these beautiful “Peruvian Lilies” are easy to cultivate, and produce in Summer abundance of showy attractive flowers, which last long in water when cut. They like a well-drained light soil and a sunny situation. *Aurantiaea*, *chilensis*, and *lutea* produce a most brilliant effect in the flower border. Plant with the top 4 inches below the surface, by preference close to a south wall or hedge, and protect, the first Winter, with leaves or litter. *Pelegrina*, *Pulchra*, and *Revoluta* are more tender, and delight in hot dry sunny situations, such as under a south wall, and require protection each winter; they also make fine plants for a cool greenhouse.

aurantiaca (*syn. aurea*), flowers ranging from rich to dark orange, spotted carmine, very showy and valuable for cutting; it should be grouped in every herbaceous border, ht. 3 ft.

per 100, 10/6; per doz. 1/6 o 2

aurantiaca major. See Novelty List, page 5.

chilensis hybrida, mixed, beautiful shades of rose, crimson, yellow, buff, and blush, with orange-yellow and crimson markings, ht. 2 ft.per 100, 7/6; per doz. 1/3

o 2

Erembaulti, bright rose with green markings, interior of flower conspicuously flaked blood-crimson on a blush ground, ht. 2 ft.per doz. 7/6

per 100, 15/-; „ 2'3 o 3

revoluta, a handsome variety, producing large heads of orange-red flowers „ 4/6

o 5

* **AMARYLLIS (Hippeastrum), choice Greenhouse Varieties.** These are magnificent in the conservatory, and with management may be had in bloom for many months.

CULTURE.—Pot up the bulbs from December to March, and plunge the pots to the rim in a gentle, steady, moist bottom heat; thus treated, a vigorous leaf-growth is produced, and a strong stem with a fine umbel of large flowers secured. In the absence of bottom heat they do well in an ordinary greenhouse or sunny sitting-room window if potted up in February.

Barr's Choice Unnamed Hybrids, purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beautyper doz. 25/-; each 2/3

Belladonna (The Belladonna Lily), bearing in Autumn umbels of beautiful large delicate pale rose flowers, ht. 2 ft in. If planted in light soil (*the top 6 inches deep*) against a south wall, it will establish itself and bloom freely every year per doz. 7/6 & 10/6; each *Sd.* & 1 0

 " " **Extra Large Bulbs**.....per doz. 15/- 1 6

Belladonna purpurea maxima, a remarkably beautiful variety bearing handsome bold umbels of large deep rose-coloured flowers, 9 to 10 on an umbel, delicately hyacinth-scented, and flowering 2 to 3 weeks before the common **Belladonna Lily**, lit. 3 ft. It is a very vigorous grower and is quite hardy planted against a south wall.....per doz. 16/- 1 9

formosissima (*Jacoea Lily*), beautiful large quaintly shaped dark crimson flowers,
ht. 1 ft.per 100, 35/-; per doz. 5/- 0 6

formosissima glauca (Jacobea Lily), differs only from above in the colour being a striking crimson-scarlet, ht. 1 ft. per 100, 35/-; per doz. 5/- 0 6

☞ The **Jacoea Lilies** may be grown in pots and forced, or be planted in the open in April for Summer flowering.

× AMORPHOPHALLUS Rivieri	(Umbrella Arum), a very handsome plant, with large palm-like leaves 2 to 3 ft. across on a white spotted stem. The tubers should be kept dry and away from frost during Winter, and may be planted outdoors March to April, four inches deep, or be potted up for indoors earlier	<i>strong tubers</i> , per doz.	15/-	1	6
" "	" "	" "	<i>monster tubers</i>	3	6

For brilliancy of colour few flowers can compare with the **Anemone**, which in Spring produces its masses of bloom in endless variety of shades ; all are valuable for cutting, lasting long in water.

CULTURE.—Any good soil, moderately well drained, suits the Poppy Anemone. Plant in succession *A. coronaria* varieties from October to April, the roots four to six inches apart, at a depth of two to three inches, choosing a dry day, and when the ground is in good working condition. In April and May, during dry weather give them a good watering two or three times a week, and when the flower buds appear water them daily if necessary. *The Spring plantings for Summer and Autumn flowering should be in a situation where the ground is moist, and shaded from the sun's rays after 10 or 11 a.m., and steep the roots in water for six hours before planting.* In cold, bleak, or low-lying districts it is advisable not to plant before December, and to cover the beds lightly with long litter or cut evergreen branches until the plants are well in leaf, and danger from severe frost is past.

The flowers resemble semi-double Hollyhocks, and are extremely handsome, ht. 1 ft. When planted from October to December, they flower in succession during the early Spring months, while those planted from January to April flower in succession from April to July.

Choice mixture of beautiful shades of rose brick-red, scarlet, ruby, etc., ht. $\frac{1}{2}$ ft. 6 6...1 0

ANEMONE fulgens, The Beautiful Starry Windflower of the Pyrenees, etc. This, with its rich *dazzling scarlet* flowers, and light elegant growth, is the most brilliant and graceful of all Winter- and Spring-flowering Anemones, and should be used largely in wild gardens, orchards, woodlands, on banks, etc. The cut flowers are invaluable for table bouquets or vases, as they last a long time in water. If planted early in Autumn, flowers may be gathered, weather permitting, from Christmas; its hardiness is beyond all question, and the roots may be safely planted any month from August to February, in a position protected from ground winds and with a sunny or S.W. aspect. *Anemone fulgens* likes a well-drained rich soil (rather dry by preference). Never plant the roots while the ground is wet.

coccinea (Scarlet Fire-Cracker of California), a remarkably handsome plant bearing graceful umbels of long tubular blood-red flowers, tipped green, 1½ ft. ...large bulbs, per doz. 4/6 o 5
congesta, lilac flowers in rosettes, valuable as a cut flower, 2 ft., per 100, 5/6; .. 10d. —
grandiflora, a most valuable dwarf early Summer flower for edgings, masses, etc., colour bright blue, ht. ½ ft.per 100, 4/6; per doz. 8d. —
Hendersoni, handsome umbels of chrome-yellow flowers, striped violet 8/6 o 9
Howellii lilacina, bearing clusters of elegant tubular flowers, pale lavender tipped white, remarkably beautiful. FIRST-CLASS CERTIFICATE R.H.S.per doz. 10/6 1 0

BRODIAEA—continued.

- Ixioides splendens**, a very handsome and beautiful variety bearing large umbels of light yellow flowers..... per doz. 4/6 o 5
- laxa** (*syn. Tritoleia laxa*), large rich Tyrian purple flowers, very handsome, ht. 1 ft. per 100, 10/6; per doz. 1/6 o 2
- Murrayana**, large deep violet-blue flowers, very handsome; a free grower and a good bulb to naturalise, ht. 9 in. per doz. 3/6 o 4
- peduncularis**, a fine handsome species, bearing magnificent umbels of large china-white flowers on very long pedicels; it likes a damp sandy loam, and does well on the sandy margins of streams per doz. 2/6 o 3
- Purdyi**, a handsome new species, of pretty dwarf habit, flowers borne in graceful umbels, soft lilac with a handsome violet bar running down centre of each petal..... per doz. 7/6 o 8
- volubilis** (**The Twining Hyacinth**), a lovely twining species, bearing a terminal cluster of pretty light rose-coloured flowers; a light covering during Winter is advisable. Very pretty in hanging baskets per doz. 5/6 o 6
- BULBOCODIUM vernum**, producing early in Spring a mass of bright rose-purple flowers, valuable for edgings, rockwork, and naturalising in grass, ht. $\frac{1}{2}$ ft. per doz. 3/- o 4
- × **CALADIUMS**, perhaps the most beautiful and picturesque of foliage stove plants.
12 beautiful named varieties, 15/-, 24/-, 30/- & 42/-; 6 ditto, 7/6, 12/-, 15/- & 21/-

CALLA, or Arum Lily. See Richardia.

CALOCHORTUS, or more popularly known as the **Butterfly** or **Mariposa Tulips**, **Globe Tulips** and **Star Tulips**. These lovely Californian bulbs, although belonging to the same Natural Order

as the Tulips of our gardens, bear little resemblance to them. They flower through June and July, and for delicacy of texture and brilliancy of colour are unsurpassed; they deserve a place in every hardy flower border and rock garden.

As cut flowers the Calochorti are of great value, the flowers lasting well and the buds opening readily in water; the varieties in the *Mariposa* or *Butterfly* section are especially suitable to cut, having long stems and being profuse continuous bloomers.

They all make charming pot-plants (several bulbs in a pot) for the cool greenhouse or Cape pit.

CULTURE OUTDOORS.—*The Calochorti* are all quite hardy. The "**Mariposa**" and "**Star Tulips**" require a sunny position and light gritty or sandy soil on slightly raised beds to ensure perfect drainage; plant from September to end of November, 2 to 3 inches deep, and 3 inches apart. Cover the beds after planting with straw or cut heather, to keep surface sweet and as a protection in case of early growth; remove the covering in March. A position facing south and sunny spots on the rockery are specially suitable. When in full growth give occasional soakings of water, but not too frequently. After flowering, ripen off by placing glass over them, and take up when foliage dies down.

The "**Globe Tulips**," being woodland plants, like partial shade and a porous soil composed principally of leaf mould.

GROUP OF MARIPOSA TULIPS.

Selections of Calochorti, from Sections I., II., and III.:

3 each of 20 beautiful varieties	22/6
3 " " 12 " "	7/6, 12/- & 18/-
1 " " 12 " "	3/-, 4/6 & 6/6

80 In the following List the numbers after the names indicate their relative order in time of flowering: thus those marked (1) are the earliest to bloom, and those marked (6) the latest. The heights we give are an average; under exceptionally good or poor conditions the plants may grow taller or dwarfer.

SECTION I.—Butterfly or Mariposa Tulips, all of remarkable beauty, with large open flowers.

Catalinæ (2), the earliest of all the *Mariposa Tulips*, bearing on tall slender stems very beautiful large flowers ranging from pale to deep lilac, with a dark maroon circle at base, ht. 16 to 24 in. per doz. 8/6 o 9

CALOCHORTUS—Section I.—*continued.*

each—s. d

- Gunnisoni** (4), large pure white expanded flowers, with an inner hairy zone of green and gold, petals shaded outside green and azure, of great beauty, ht. 18 to 24 in., fine for cutting. AWARD OF MERIT R.H.S. per doz. 10/6 I 0
- Kennedyi**, a most lovely species, although a little difficult to grow; the flowers are of a brilliant brick-scarlet with black central blotches, ht. 6 to 12 in. Plant in a warm sunny situation in a stony or gravelly soil per doz. 25/- 2 3
- luteus concolor** (Baker), a grand variety with large open flowers, golden-yellow, centre fringed and prettily marked with brownish red. AWARD OF MERIT R.H.S. per doz. 18/6 I 9
- macrocarpus** (4), a splendid species, bearing very large flowers of a beautiful pale lavender, with dark centre banded green, ht. 12 to 18 in. AWARD OF MERIT R.H.S. per doz. 6/6 0 7
- nitidus** (4), bearing several large flowers, white flushed lilac, each petal covered with long hairs, and having a bold indigo blotch, beautiful, ht. 15 to 18 in., per 100, 25/-; per doz. 3/6 0 4
- Plummeræ** (4), bearing a branching spike of beautiful large soft lavender flowers, each petal lined with long silky golden hairs, ht. 12 to 18 in. FLORAL CERTIFICATE R.H.S. per doz. 8/6 0 9
- splendens atro-violaceus** (5), having handsome brilliant purple flowers, with deep red blotch on petal, free-flowering, ht. 24 to 30 in. per doz. 4/6 0 5
- „ **ruber** (4), bearing on tall slender stems large showy flowers of an exquisite lilac shade with purplish red centre, and covered with silky hairs, very beautiful, ht. 16 to 30 in. per doz. 7/6 0 8
- Venustus group**, all having flowers of exquisite beauty, large and elegantly formed, valuable for cutting, ht. 2 ft.; *these are all robust growers.*
- „ **citrinus** (4), large flowers of a beautiful clear bright yellow, with conspicuous dark maroon blotch on middle of each petal, centre finely speckled maroon, and with a cushion of golden hair, *of exquisite beauty*; a gem for cutting, ht. 16 to 24 in. FIRST-CLASS CERTIFICATE ... per 100, 12/6; per doz. 1/9 0 2
- „ **El Dorado** (3), a new race of the lovely *Butterfly Tulips* of tall sturdy growth, from 1½ to 2 ft. in ht., flowers varying greatly in shade—from white and cream to lilac, deep velvety purple and rosy purple, red, pink, and salmon, all having the centre exquisitely blotched and speckled soft brown and golden-yellow, while some have a beautiful golden blotch on each petal. AWARD OF MERIT R.H.S. per 100, 12/6; per doz. 1/9 —
- „ **oculatus**, a most beautiful variety, forming very long dark rose-coloured buds opening white with very dark blotch on petal, margined yellow, centre beautifully marked, exterior of flower rosy purple. AWARD OF MERIT R.H.S. per 100, 12/6; per doz. 1/9 0 2
- „ **purpurascens** (4), a lovely variety, flowers large, outside purplish, inside creamy white, each petal handsomely blotched, very free-flowering, ht. 12 to 24 in. AWARD OF MERIT R.H.S. per doz. 4/6 0 5
- „ **roseus**, flowers white, with carmine-rose on back of petals, inside having rosy red blotches and a rich maroon centre, beautiful, ht. 12 to 28 in.
- „ „ **superbus**, a very lovely vigorous growing form of the above with more intense colouring. per doz. 5/6 0 6
- „ **Vesta** (4), a lovely variety and one of the freest growers; flowers large, and borne freely on long stalks, colour outside rose-purple, inside creamy white, with a broad halo of crimson-maroon and below this crimson-brown pencilling on a lemon ground, ht. 20 to 30 in. ... per 100, 18/6; per doz. 2/8 0 3
- „ „ *extra large bulbs* „ 5/6 0 6
- Weedii** (4), a slowy species, with large clear orange-yellow flowers, thickly lined with silky hairs and dotted brown, ht. 12 to 16 in. per doz. 10/6 I 0
- mixed Butterfly or Mariposa Tulips.** Everyone should grow these gems both in the open ground, on rockwork, and in pots per 100, 12/6; per doz. 1/9 —
- SECTION II.—Globe Tulips or Fairy Bells.**—These are the perfection of grace, with beautiful globular drooping flowers; charming little subjects for half shady nooks on rockwork. They were formerly known as *Cyclobothras*.
- albus** (Fairy Lamp) (3), a species from the Sierras, bearing on branching stems several pearly white hairy flowers, which hang in pendent globes, ht. 12 to 14 in., per 100, 15/-; per doz. 2/3 0 3
- „ **The Pearl**, a species from the Coast Range, bearing larger and handsomer flowers of a pearly white, tinged pink and brown, very globular *Crop failed*
- amabilis** (2), bearing a quantity of golden globe-like pendent flowers, margins fringed with hair, dwarf and beautiful; of easy culture, ht. 8 to 10 in. per 100, 15/-; per doz. 2/3 0 3
- amœnus** (Pink Globe Tulip) (2), a lovely new species, bearing lovely pendent globe-shaped flowers of a beautiful rose colour, ht. 6 to 8 in. FLORAL CERTIFICATE R.H.S. per doz. 4/6 0 5
- pulchellus, true**, a lovely species, with flowers twice the size of *C. amabilis* and of finer form, colour delicate pale lemon per doz. 6/6 0 7
- mixed Globe Tulips or Fairy Bells** per 100, 12/6; „ 1/9 —
- SECTION III.—Star Tulips.** These produce dainty open cups on slender dwarf stems, and are of exquisite beauty. On rockwork they are very charming.
- Benthami** (1), bright yellow with dark blotch at base, and covered with yellow hairs, ht. 4 to 6 in. per 100, 15/-; per doz. 2/3 0 3

CALOCHORTUS—Section III.—continued

each—s. d

- Howellii**, a fine *Giant Star Tulip*, with large pale straw-coloured flowers, ht. 12 to 15 in. per doz. 15/- I 6
- lilacinus** (1), a beautiful dwarf species bearing numerous large pale lilac flowers, with or without a dark blotch, of easy culture, ht. 6 to 10 in.per 100, 15/-; per doz. 2/3 O 3

- „ **Purple King**, having noble spikes of handsome rich violet-blue flowers, very fine, ht. 2 ft.per doz. 4/6 O 5
- „ **new seedling varieties**, containing many beautiful shades of blue, lavender, French white, etc., flowers large and handsome, ht. 2 ft. per doz. 5/6 O 6
- CANNAS.** See our *Spring Catalogue of Bulbs and Tubers*.
- CHINESE SACRED LILY.** See *Narcissus Polyanthus*, page 66.
- CHIONODOXA (Glory of the Snow).** The *Chionodoxa* is one of our earliest as well as loveliest Spring flowers, and when established its sheets of blue in very early Spring are a great attraction in the garden. It should be largely used in borders and dotted over bulb beds, also massed on rockwork. Once planted it comes up year after year, the flower spikes increasing in size and beauty each season. If grown in pots and jardinettes the *Chionodoxa* may be had in bloom early in January, but should be brought on in a cold frame or cool greenhouse close to the glass. When associated with *Narcissus minimus*, the effect is very charming. For an effect the first season, plant the bulbs close together.
- Luciliæ (The Glory of the Snow)**, colour deep Nemophila-blue, with clear snow-white centre per 1000, 40/-; per 100, 4/6; per doz. 8d.

☞ Other species such as <i>brachyphyllum</i> , <i>hydrophyllum</i> , and <i>libanoticum</i> , can be supplied, but they differ very little from <i>montanum</i> .			

× **COMMELINA tuberosa** (Blue Spiderwort), a fine border plant, covered with flowers of the richest gentian blue, from Summer to Autumn. Plant outdoors in April in a sunny situation, or start earlier in a gentle warmth and plant out in May; lift the tubers in Autumn, and store during the Winter in dry sand, ht. 1½ ft.per 100, 7/6; per doz. 1/3 0 2

× **COOPERIA Drummondii** (Evening Star), a lovely little bulbous plant from Texas, requiring out of doors a sunny sheltered situation and light soil, otherwise a frame or cool greenhouse; it produces long tubular waxy *white* flowers slightly tinged *red* outside, opening in the evening with a delicate primrose fragrance, ht. ¾ ft.per doz. 7/6 0 8

CORYDALIS bulbosa, a very graceful little Spring flower for front border and rockwork, flowers rosy purple, ht. ½ ft.per 100, 5/6; per doz. 10d. —

„ **Ledebouriana**, a beautiful little creeping species from Bokhara, bearing racemes of rosy purple flowers in February and March.....per doz. 12/6 1 3

BARR'S CHOICE NAMED LARGE-FLOWERED CROCUSES.

Large Bulbs for Pot-Culture and Flower Beds, etc.

The following large-flowered named **Crocuses** are the best in cultivation, and we can confidently recommend them for planting in groups, edgings, select beds, and in designs. *To obtain the finest effect the bulbs should be planted an inch apart.* When grown in pots, plant thickly, and plunge the pots in ashes up to the rims only. When removed from under the ashes, place in an airy situation, and give water very freely at the roots. A charming effect is obtained by growing **Crocuses** in shallow saucers, using **Barr's Fertilised Fibre and Shell Mixture**, or **Pebbles and water** (the bulbs touching one another), and this may be accomplished in an ordinary sitting-room.

CROCUSES.

BARR'S AUTUMN-, WINTER- AND SPRING-FLOWERING SPECIES.

No hardy garden is complete without these floral gems, which carry on a continual display of bloom from August to March, and light up the garden with their bright colours in winter when few other plants are flowering. On rockwork and in grass they form a charming picture, while in pots they make a very pretty effect. In nomenclature we have followed Mr. GEORGE MAW'S MONOGRAPH ON THE CROCI. The delightful effect produced by masses of **C. speciosus**, **C. longiflorus**, **C. sativus**, **C. Tommasinianus**, etc., when naturalised, can only be realised by those who have witnessed it.

CULTURAL DIRECTIONS.—Any ordinary garden soil suits these Crocuses. Plant the bulbs as early as possible, and very shallow, barely covering them with soil.

BARR'S AUTUMN-, WINTER- AND SPRING-FLOWERING CROCUSES—*continued*.

A Full Descriptive List of our Crocus Species, with their native habitats given, may be had on application.

The few species quoted in the following list are mostly those we can offer cheaply in quantity, and we can strongly recommend them for naturalising and massing on rockwork, in grass, etc., where their beauty will delight the eye from Autumn till early Spring.

Autumn-Flowering.		per 100 per doz.				per 100 per doz.	
		s.	d.	s.	d.	s.	d.

CROWN IMPERIAL. See *Fritillaria imperialis*, page 30.

CYCLAMEN Persicum, for Greenhouse, Large-Flowered Strain, a great improvement on the old strain; plants are of fine compact habit, with flowers large, of rich and delicate colours, and standing well above the handsome foliage.

Plants in Pots set with bud or in bloom, supplied from September to December—per doz. 15/-, 21/-, 25/-, and 30/-; each 1/6, 2/-, 2/6, 3/6, and 5/6, according to size.

Seed for November Sowing.....per pkt. 2/6 and 3/6

CYCLAMEN. HARDY SPECIES for Rockwork Out-of-Doors.

HARDY CYCLAMEN NATURALISED AT FOOT OF A TREE.

These **Hardy Cyclamen** require perfect drainage, and shelter from the cutting winds of March and April, and the hot rays of the Summer sun; at the bottom of old walls facing north and on rockwork they are very beautiful, while, nestling in the grass, near the roots and under the shelter of old trees, they produce a most charming effect. In making up a soil for the hardy Cyclamen, add a liberal proportion of old lime or mortar rubbish and some old peat or leaf soil. *C. Europeum* is fragrant, and flowers August to September. *Ibericum* varieties and *Coum* bloom in Spring; *Repandum* closes the Cyclamen season in April; this species should, in cold districts, be planted in warm protected situations on rockwork, and covered with cut heather, straw, or a few light boughs, to keep off cutting ground winds till March. They may also with advantage be grown in cold frames.

Cyclamen neapolitanum is perfectly hardy, and is covered with bloom during September, while from Autumn to Spring its large and beautifully variegated leaves render it valuable for Winter beds, intermixed with Seillas, Chionodoxas, Leucojums, Miniature Daffodils, Snowdrops, Muscaris, etc.

Hardy Oyclamen, Autumn-, Winter- and Spring-Flowering.

10 varieties, 3 roots of each, 21/- | 10 varieties, 1 root of each, 7/6

- africanum** (*syn. macrophyllum*), not recommended, being an unsatisfactory grower. each—s. d
- cilicicum**, white, with bright purple centre, Winter-flowering, rare, per 100, 42/-; per doz. 5/6 o 6
- coum**, flowers a pretty deep rose, in early Spring; differing only from *C. ibericum* in having a plain green foliage.....per doz. 6/6 o 7
- europæum**, crimson, sweet-scented, flowering August to September. Plant this variety in a shady situation 4 to 5 in. in peat..... per 100, 21/-; per doz. 3/6 o 4
- ibericum**, having a pretty silvery zoned foliage, and flowering in early Spring.
- „ **Atkinsii**, white, with crimson eye, very pretty per doz. 15/- 1 6
- „ **roseum**, bearing pretty rose-coloured flowers..... „ 10/6 1 0
- „ **rubrum**, flowers deep crimson, showy..... „ 7/6 o 8
- „ **mixed varieties**.....per 100, 30/-; per doz. 4/6 —
- neapolitanum** (*syn. græcum* and *hederæfolium*), the **Ivy-leaved Cyclamen**, producing in Autumn rosy pink flowers and in Winter large handsome silvery marbled foliage. This Cyclamen should be largely used for winter beds, associated with early spring-flowering bulbs, such as **Chionodoxas**, **Snowdrops**, **Leucojums**, etc., to which its beautiful foliage forms a charming ground-work..... *Extra strong roots*, per 100, 42/-; per doz. 5/6 o 6
- „ **album**, pure white flowers and very beautiful silvery marbled foliage..... „ 10/6 1 0
- repandum** (*syn. vernum*), bright crimson; established masses are very beautiful in Spring per 100, 40/-; per doz. 5/6 o 6
- „ **album**, pure white „ 15/- 1 6

CYCLOBOTHRA. *Now included under Calochortus.*

each—s. *d*

- × **CYPELLA platensis**, a most beautiful plant from La Plata, bearing in Summer a succession of deep sky-blue flowers with white and yellow centre; suitable for pots or flower borders; ht. 2 to 3 ft.; treatment same as required for *Tigridia*.

Orders booked for delivery in March, extra strong bulbs, per doz. 12/6 I 3

× **CYRTANTHUS.**

angustifolius grandiflorus, THE FINEST OF ALL THE CYRTANTHII of the *Monella* section, and a handsome greenhouse plant for autumn flowering; it produces spikes $1\frac{1}{2}$ to 2 ft. high, bearing umbels of 12 to 15 flowers of a brilliant orange-scarlet.....

glaucophyllus. See Novelty List, page 6. **Marian.** See Novelty List, page 6.

sanguineus (Inanda Lily), a grand species, having large *scarlet* flowers; a splendid green-house plant, ht. 1 ft. per doz. 36/- 3 6

x **DAHLIAS, Pot-grown Dry Roots**, ready to send out in November.

If these are started into growth early in March and grown on, they will bloom much earlier than plants from cuttings, a great advantage where Dahlias are required either for decoration in the garden or for cutting. A descriptive list of Dahlias can be had on application in January.

DAFFODILS, Trumpet, Chalice-cup, and Star Narcissi. See Daffodil Catalogue.

DAFFODILS - NOSEGAY. *See Polyanthus Narcissi.* *See page 65.*

DEUTZIAS. See List of Plants and Shrubs for Early Forcing, page 91.

- × **DICENTRA** (*syn.* **Dielytra**), The Lyre Flower, for Forcing or Planting out. Very graceful pot-plants for conservatory and room decoration, and valuable for cutting. The elegant pendent branches are loaded with heart-shaped flowers, and furnished with the most graceful delicate green foliage. In **shrubberies or shady borders**, few plants in Summer are so attractive. Plant in half shade with a S.W. or W. aspect.

spectabilis, beautiful rosy crimson heart-shaped flowers and delicate green foliage, of graceful growth, ht. 1½ to 2 ft. *extra strong clumps*, per doz, 6/6 0 7

alba , heart-shaped flowers of a pretty blush-white slightly shaded pink,	
ht. 1½ ft.....	strong clumps , per doz. 15/-

DIERAMA pulcherrima. *See Sparaxis.*

ERANTHIS cilicica, a new Winter Aconite. See page 91.

hyemalis. *See* **Winter Aconite.**

- EREMURUS**, beautiful border plants of noble aspect. They delight in a half-shaded situation protected from the morning sun and sheltered from high winds ; a rich deep well-drained loamy soil should be given them.

Bungei, flowers in July, yellow with orange-coloured anthers, covering one-third of the stems, quite hardy ; a handsome border plant, ht. 5 to 6 ft. 7 6

himalaicus, a most lovely species from the Himalayas, and one of the hardiest. It attains a height of 5 to 8 ft., bearing dense flower-spikes nearly 2 feet long of large snowy white flowers with golden anthers, from May to June 2/6 & 3/6

himrob, a grand hybrid from *himalaicus* x *robustus*, flowering early and producing immense long flower spikes, densely clothed with large flowers of a beautiful blush shade, ht. 8 ft. per doz. 36/- 3 6

robustus, a lovely species, producing large stately spikes of flesh-coloured flowers in May and June, ht. 6 ft. *Roots according to size*, each 3/6, 5/6 & 7 6

„ **Elwesianus**, a grand variety, bearing in Summer noble and stately spikes, crowded with large beautiful flesh-coloured flowers, delicately scented, ht. 6 to 10 ft. AWARDED FIRST-CLASS CERTIFICATE R.H.S. 5 6

"Shelford," a grand hybrid of *Bungei* x *Olga* with long handsome spikes of coppery yellow tinged red, ht. 5 to 7 ft. 10 6

Warei, a grand species of tall stately growth with a wonderfully long spike of flowers, coppery orange-red shaded bronze, very handsome, ht. 5 to 7 ft. 45 0

Seedling Varieties, being crosses of *himalaicus* x *robustus*, producing long handsome flower spikes densely clothed with bluish-coloured flowers, ht. 6 to 8 ft.per doz. 15/-

ERYTHRONIUM (Dog's-Tooth Violets). In Spring there is no prettier sight than a mass or edging of **Dog's-Tooth Violets**, with their prettily variegated foliage and graceful Cyclamen-like flowers. Naturalised in grass they present a charming picture.

Δ indicates the large handsome American varieties strongly recommended for choice positions in the rock-garden or for pot-culture; they all prefer a partially shaded and moist but well-drained situation. Plant the roots about 6 to 12 inches deep (the lighter the soil the deeper) and surround with sand.

These American Erythrioniums will be sent out early in October, and *should be planted at once*. The other Erythrioniums can be supplied in September.

Dens-canis, purple , ht. $\frac{1}{4}$ ft.

Δ Mixed American Large-Flowered Dog's-Tooth Violets , all very beautiful, recommended for naturalising in shady and moist situations.	<i>Special cheap offer</i> , per 100, 10/6; per doz. 1/6	—		

EUCHARIS amazonica (*The White Amazon Lily*), the snow-white flowers of this handsome stove-plant are deliciously fragrant, and are much used for bouquets and wreaths, ht. $1\frac{1}{2}$ ft. *Strong single bulbs*, per doz. 21/- 2 0

× **EUCOMIS punctata**, a handsome Autumn-flowering plant, with spotted foliage and long spikes of wax-like white starry flowers spotted rose, very fragrant, ht. 2 ft. Plant out of doors in March or April in a rich light soil and sunny situation, or pot up earlier for indoor decoration; in Autumn lift the tubers and store in dry soil during winterper doz. 8/6 o 9

EURYCOLES Cunninghamsi and **sylvestris**. *See Novelty List, page 6.*

Barr's Lawn Grasses for September Sowing.

Lawns should be renovated in September, after the wear and tear of Summer, sowing at the rate of 1 lb. per 100 square yards. Barr's Thames Embankment Mixture, 1/- per lb.; Barr's Standard Mixture for fine Lawns, 1/8 per lb.; Barr's Dwarf Mixture for extra fine Lawns, 2/3 per lb. Leaflet, with full particulars and many hints on the management of Lawns, sent on application.

FREESIA. Freesias are prized for their delightfully fragrant graceful flowers, which last longer in water than almost any other flower. They are easily grown, and may be forced into bloom by Christmas if required. Plant the bulbs in September and October, 6 in a 5-inch pot, or 12 in a 7-inch pot makes a better display. The tops of the bulbs should be buried 2 inches below the surface of the soil, which should be a compost of good mellow loam, well-decayed farm-yard manure and a little bonemeal. Care must be taken that there is good drainage. Stand the pots outside on a sunny border and keep them slightly shaded until growth is showing, when expose them to full sun. About the end of October, or before severe frost comes on, remove the pots to the sunny part of a greenhouse and give plenty of air (not draught). Or they may be placed in an airy, sunny window, care being taken not to expose them to draught or the drying heat arising from gas. When the flower buds are opening, a little weak liquid manure water will be found beneficial.

A POT OF FREESIAS.

Chapmanii. See Novelty List, page 6.

Leichtlini major (true), primrose, with orange blotch, $1\frac{1}{2}$ ft., per 100, 6/6; per doz. 1/- each -s. d

FRITILLARIA imperialis—the Crown Imperial.

The Crown Imperial (*Fritillaria Imperialis*) is a stately hardy border-plant, very effective in Spring, especially when grouped in woodlands, wild gardens, orchards, etc. Its tall, stout, leafy stem terminates in a cluster of large drooping bell-shaped flowers, surmounted by a whorl of fresh green leaves. For forming bold groups in the permanent border or on lawns it is of great value, and should be allowed to remain undisturbed. To obtain the best success, *plant the bulbs in September*, the top 4 to 5 inches below the surface, and by preference on their sides, to prevent moisture accumulating in the centre. They flourish in a good deep loam. *We offer specially strong selected bulbs, superior to what are usually sold*, and which we hope will all bloom the first season. The Crown Imperial, however, is a plant which requires to become established to do well.

FRITILLARIA IMPERIALIS (CROWN IMPERIAL).

Mixed, various shades, suitable for naturalising *strong selected bulbs*, per doz. 7/6 —

GALANTHUS (Snowdrop).

In the early Spring months there is nothing more beautiful than a sheet of the snowy graceful blossoms of the SNOWDROP. In planting, the bulbs should almost touch each other. An effect of surpassing beauty may be obtained by associating SNOWDROPS with SCILLAS SIBIRICA and BIFOLIA, CHIONODOXAS, WINTER ACONITES, etc. Where possible such plantings should be permanent, and the surface of the soil top-dressed in Summer and sown with annuals, such as Nemophila, Leptosiphon, etc., or planted with surface-rooting bedding plants. The SNOWDROP and CROCUS when planted in alternate circles are very effective, and follow each other so closely that no gap is left in the succession.

The SNOWDROP looks charming when nestling in grass, on hedge banks, etc. The turf need not be disturbed if *Barr's Bulb Planter* be used (*see page 93*); this cuts out clean holes large enough to take two or three bulbs.

Permanent plantings of Snowdrops should be made as far as possible in shady situations.

The above Single and Double Snowdrops cannot be guaranteed to flower all true. Amongst the Doubles will be found some Singles, and vice-versa; the admixture however in no way impairs the charming effect they produce in the spring garden.

GALANTHUS Elwesii, *Elwes' Giant Single Snowdrop*, a distinct and beautiful species, and the largest and most handsome of all Snowdrops. It has very large snowy globular flowers, the inner segments being marked rich emerald-green and white. The bulbs for naturalising should be planted where possible on slopes or in woodlands, in unmanured soil. They often die after the first year's flowering, but reproduce themselves by seed.

Leaflet, with full particulars and many hints on the management of Lawns, sent on application.

× GLADIOLUS.

BARR'S EARLY-FLOWERING VARIETIES.

For Autumn and Winter Planting.

EARLY-FLOWERING GLADIOLUS "BLUSHING BRIDE"
(Much reduced).

These beautiful **Early-flowering Gladioli** should be largely planted for supplying cut bloom from May to July; and for the fine effect they produce in the flower garden. **G. Colvillei** *The Bride* is extensively grown in pots and boxes for cutting during April, May, and June. All may be grown in pots for indoor decoration.

CULTURE OUTDOORS.—Select a situation protected from cutting winds and shaded from the midday sun. Deeply dig the ground, working in plenty of rotten manure in the underspit, and see that the soil is made light and friable; plant the bulbs from October to January, at a depth of four to five inches, and in the case of the later plantings soak the bulbs in water a few hours before putting them in the ground. Before severe frost comes on cover with a little long straw litter or other light material, which remove in March. *Gladiolus byzantinus* and the *Colvillei* varieties are best planted in October or early in November. If the Summer is dry and the weather hot, give an occasional good soaking of water or weak liquid manure. A mulching of well-decayed manure in early summer will considerably benefit the plants.

CULTURE FOR CONSERVATORY DECORATION.—Plant three to five bulbs, according to size, in a 5- or 6-inch pot, and plunge in ashes up to the rim of the pot in a cold frame or pit, withholding water till the bulbs have started into growth; or, the pots may be buried up to the rim in ashes out of doors under a south wall, a light covering being given during severe frost. When the plants are in bud they may be removed to the conservatory or greenhouse.

× **EARLY SUMMER-FLOWERING HARDY GLADIOLI.**

These commence to bloom out of doors the beginning of June or by gentle forcing may be had in flower in April and May.

× GLADIOLUS BRECHLEYENSIS.
The Large-flowered Vermilion-Scarlet Gladiolus.

This well-known handsome *Gladiolus* blooms just before the *Gladiolus Gandavensis* varieties, and is one of the most valuable for bedding. By successional plantings a brilliant display of bloom may be had from middle of July to late autumn. A fine effect may be produced by massing this *Gladiolus* with *Galtonia candicans*, the snowy white spikes of which top the Scarlet *Gladioli*; both bloom about the same time.

angustifolius true (*syn. Iuvernii*) (St. Brigid's Christmas Rose). This is certainly the finest pure white large-flowered Christmas Rose, and one of the hardiest and best growers; the foliage is of a clear fresh green, and the snowy white flowers are produced from January to Marchper doz. 25/- 2 6

Madame Fourcade, a fine white intermediate-flowering variety, coming in between *altifolius* and the type*strong clumps*, per doz. 25/- 2 6

HELLEBORUS ORIENTALIS. See Hardy Plant Catalogue, free on application.

HEPATICA.

Old English Flowers.

These are charming Spring flowers, and have been favourites in English gardens from time immemorial. Established on shady banks, in beds, borders, and on rockwork, they are most beautiful in early Spring. The Hepatica is a deep rooter and loves a deep loamy soil in somewhat shady and sheltered positions. Naturalised, the Hepatica looks charming. Plant from Autumn to early Spring.

The **Single Blue**, **Single Red**, and **Double Red** can sometimes be supplied in established clumps at 2/6 and 3/6 each.

HIPPEASTRUM pratense, a handsome bulbous plant producing an umbel of showy brilliant scarlet flowers, ht. 1 ft. Suitable for pots in cold greenhouse or to plant outdoors 9 in. deep at foot of a south wall 2/6 & 3 6

HOMERIA collina (Bobartia), a beautiful Sparaxis-like plant, producing in May a profusion of orange-red flowers with yellow centre, measuring 2½ inches across, ht. 2 ft., cultural treatment same as for *Ixias*per 100, 5/6; per doz. 10d.

BARR'S CHOICE NAMED HYACINTHS.

For Glasses, Jardinets, Bowls, Pots, and for Exhibition.

Culture In Pots.—The soil should be a compost of good fibrous loam with a liberal addition of leaf-soil, sharp sand, and thoroughly well-decayed cow manure. PHYTOBROMA (see page 94) may also be added at the rate of 1 lb. per bushel. The compost should be well mixed and left to stand some time before being used. New pots should be well soaked in water before use.

In potting, barely cover the bulb, and let the soil be ¼ in. below the rim of the pot, to allow for watering. After potting give one good watering and then place the pots outdoors on a bed of ashes, cover with six inches of cocoa fibre, and leave them exposed to all weathers. When the bulbs have well rooted, and made about an inch of top growth, they may be removed indoors, first into a subdued light, until the blanched foliage has attained its full green colour, and then into the sunniest situation at command in the greenhouse or conservatory. It is a good plan to place an inverted flower pot over the young growths for a few days after being removed from the plunging bed, as by so doing they are protected from possible draught. Abundance of air, a moderately moist atmosphere, and plenty of water at the roots are then necessary for early well-developed flower-spikes. A dry or frosty atmosphere or a draughty situation will cause the flower-buds to shrivel. Forcing should only be done gently, the temperature not exceeding 60 degrees. A too frequent fault made in forcing Hyacinths is that they are subjected to heat before the bulbs are fully rooted.

For earliest flowers—namely, for January and February—pot middle of September and leave in the plunging bed 10 to 12 weeks.

☞ If finely developed trusses and rich colours are preferred to very early flowers, the Hyacinth should not be forced; pot up the bulbs middle of October and leave them plunged out of doors three months or more, according to season, then remove them to a mild temperature like that of a cool greenhouse, a sitting-room window, or frame, always selecting the sunniest and most genial situation.

Culture in Jardinets.—For this purpose *Barry's Fertilised Fibre, Shell and Charcoal Mixture* is undoubtedly the best material to use. It should be always kept moist, and when the jardinet is removed to the sitting-room the surface should be covered with fresh green carpet moss or mossy Saxifrage. Grown in jardinets, **Hyacinths** are charming when associated with early Spring-flowering bulbs like **Chionodoxas**, **Scilla sibirica**, **Snowdrops**, **Tulips**, **Crocuses**, **Narcissi**, **Iris reticulata**, etc.

BARR'S NEW "PRIZE-WINNING" EXHIBITION HYACINTHS.

Ψ indicates those sorts which should be selected where the bulbs are required for growing in glasses.

EARLY WHITE ROMAN HYACINTH.

BARR'S EARLY WHITE ROMAN HYACINTHS
GROWN IN BOWL OF PEBBLES AND WATER.

Extra Selected French-grown Bulbs.

This charming little Hyacinth is of great value for early forcing, and may be had in bloom during November, December, and January by successional plantings. Several bulbs in a pot make a charming Winter decoration for the greenhouse or sitting-room, while to cut for bouquets and vases the graceful spikes of sweet-scented blooms are highly prized. The Roman and Italian Hyacinths lend themselves readily to culture in howls of pebbles and water or our fertilised fibre, shell and charcoal mixture. (*For Cultural Directions, see page 2.*)

IRISES.

These may be called the “Orchids” of the flower garden, their blossoms competing in richness and variety of colour with the choicest and the most beautiful Orchids. They should be extensively planted in flower and shrubbery borders, and naturalised; a judicious selection will give a display of bloom from Christmas to August. See our *Hardy Plant Catalogue* for all kinds of Flag Irises.

BARR'S ENGLISH IRIS.—June- to July-flowering.

The Finest Collection Existing.

These magnificent English Irises (*I. xiphioides*) thrive in any ordinary garden soil. *The earlier the planting, after beginning of September, the greater the success*, although the bulbs may be put in as late as December. The varieties contained in our collection we have specially selected as being the finest and most distinct, and they will be found as *strikingly beautiful in colour as the most sumptuous Orchids of the hothouse*. They flower from end of June to beginning of July, thus succeeding the **Bearded Flag Irises** and **Spanish Irises**. As cut flowers they take a first place.

BARR'S SPANISH IRIS—June-flowering.

The Finest Collection Existing.

GROUP OF SPANISH IRISES (*Very much reduced*).

These Spanish Irises (*Iris Xiphion*) flower a fortnight before the English, and differ from them considerably, the colours of the flowers being showier and more varied. The curious and charming blendings of shades in the same flower give them the appearance of many of our rare orchids, with which they can well compete in grace and beauty. For vases and bouquets the cut flowers are greatly prized, as they last long when cut, and the buds open well in water. For filling flower-beds and massing in borders these elegant Irises are of the greatest value. **The varieties forming our collection are the finest and most distinct in cultivation.** They are easily grown in any good light soil either in an open or partially shaded situation. They will also bear very gentle forcing in pots, but this should not be attempted until the flower buds are developing.

GRAND NEW VARIETIES OF SPANISH IRISES.

These are improvements on the older varieties, having a sturdier habit of growth with larger flowers of greater substance. We can strongly recommend them for the flower border and pot-culture.

Orders should be sent in early, as the stocks are limited.

VARIOUS BEAUTIFUL IRISES.

Bulbous, Tuberous, and Rhizomatous.

THESE IRIS SPECIES are all hardy and beautiful, flowering one after the other from November to June. The dwarf early species will be more enjoyed if planted on rockwork, where the flowers have a little protection from heavy rains. *Alata*, *Reticulata* var. *Histrio* and *Histrioides*, *Vartani*, and *Unguicularis* (*Stylosa*) vars., are charming Winter-flowering species, followed in February by *I. reticulata*, with its lovely violet-scented blossoms, the sweet-scented *I. persica*, *Bakeriana*, *Danfordie*, and the beautiful species *I. Rosenbachiana* and *Sindpers*. Next in succession come the interesting *Bucharica*, *Caucasica*, *Grant Duffi*, *Orchioides*, *Warleyensis*, *Willmottiana*, the curious Snakeshead *Iris tuberosa*, and the species *I. Sindjarensis* and *assyriaca*. These are followed closely by the *Cushion Irises*, with their large handsome flowers; surpassing in beauty and interest any written description that can be given of them. The pretty Peacock Iris (*I. pavonia*), the beautiful *Iris cristata*, and *Iris flavissima* flower in May, and are followed in June by *Irises juncea*, *Boissieri*, *lusitanica*, and *tingitana*.

IRIS—Beautiful Bulbous, Tuberous, and Rhizomatous Species—continued.

CULTURE.—The Irises marked Θ in the following list belong to the *Oncocyclus* and *Regelia* sections (*Cushion Irises*), and are remarkable for their great beauty. These are best planted in December, if the roots can be kept in good condition and from growing until that time (they should be stored in a cool and dry place). Plant so that the tops are not more than $1\frac{1}{2}$ inches below the surface, in a light loamy but thoroughly well-drained soil into which plenty of bonemeal has been worked (5 lb. to the square yard); cover with three or four inches of wheat straw or, better still, marsh reeds, or cut heather, which remove in March. Immediately the plants have done flowering place over them a hand light, or panes of glass elevated eighteen inches above the ground, so as to admit at the sides a free entry of air, and at the same time to keep off rain till October. The object desired is to thoroughly ripen the roots, and prevent their starting into growth too early. The covering in Winter is to keep off heavy rains, and discourage a

premature growth. The *Oncocyclus Irises* like to remain undisturbed for years; they may however be lifted four or five weeks after flowering, and stored on a dry sunny shelf in perfectly dry sand till December. The great beauty of these Irises, especially when seen in established masses, will fully repay the little extra trouble in growing them.

The Irises marked \dagger belong to the *Juno* section, and thrive best planted in rich light or sandy soil with a light dressing of old manure. As they are mostly winter and early spring-flowering species give them a position protected from the early morning sun.

(Coloured Plate of the *Oncocyclus Irises*, *Gatesii*, *Lorteti*, and *Lupina*, price 6d. Coloured Plate of *Irises*, *Atrofusca*, *Bismarckiana*, *Atropurpurea*, and *Helene*, price 6d.)

Θ S. is used to signify **Standards**, or the erect petals; F. **Falls**, or the drooping petals.

IRIS ALATA.

- \dagger **Alata alba**, a beautiful and rare variety, flowers white shaded pale pearly blue, ht. $\frac{1}{2}$ ft. each—s. d
Arenaria, forming little masses only 2 inches high, flowers pretty bright canary-yellow; a gem for dry sunny spots on rockwork in light soilper doz. 7/6 0 8

NEW HYBRID IRISES.

Regelia × Oncocyclus Varieties.

A lovely new race of Irises, being the result of crosses between the Regelia and Oncocyclus sections. They caused a great sensation at the Royal Horticultural Society's Show, May 17th, 1904, when first shown, several being awarded certificates. These Irises have proven to be of easy culture, and we can strongly recommend them to Iris lovers.

	each—s.	d
Artemis , large flower, with bold standards of a violet-purple profusely veined, fall densely lined violet-purple on white, and having a dark velvety blotch. FIRST-CLASS CERTIFICATE R.H.S.	10	6

Psyche , flower large and beautiful, finely lined purple on a cream-coloured ground and with a velvety crimson-black blotch. AWARD OF MERIT R.H.S.	4	6

BARR'S FLAG IRISES.

Tall Bearded, Dwarf Bearded, and Japanese, etc.

These beautiful Irises form a great feature in our cultures. They supply a floral decoration from March to July. Plant in Autumn—for full descriptive list, see our HARDY PLANT-CATALOGUE.

IXIA.—The African Corn Lily.

A most graceful plant, bearing on wiry stems 15 to 21 inches high long loose racemes of bloom of remarkably rich and varied colours. All have a brilliant dark centre, and in the sun's rays present a picture of *gorgeous beauty*.

CULTURE IN POTS.—From October to January plant five or six bulbs in a four- or five-inch pot, using a compost of turfy loam, leaf soil, and silver sand. Make the soil firm about the bulbs, and plunge the pots, up to the rim only, in ashes in a cold pit or frame, or under a south wall. Until a little top growth has been made no water should be given, and then only sparingly at first. When the plants are in growth, the lights should be left off except during wet or frosty weather. Early in February, or when sufficient growth has been made, remove the plants to the greenhouse, keep close to the glass, and carefully attend to the watering.

CULTURE OUTDOORS.—Plant from November to January, at a depth of three inches, and the bulbs two inches apart, on raised beds, in a prepared light loamy soil, in a sunny situation, protected if possible from cold east and northerly winds. When planting cover the bulbs with coarse sand. A covering of straw, litter, heather, or other light material, will protect the early top growth from frosty winds, but it should be removed in March.

Double Jonquil, flowers of a rich full yellow, small, very elegant, and delightfully fragrant.....per 100, 8/6 1 3

For *Campernelle Jonquil* and *Queen Anne's Double Jonquil*, see *Narcissus Odorus* varieties, page 33 of *Daffodil Catalogue*.

LACHENALIA, very beautiful greenhouse plants flowering in early Spring, with curiously spotted leaves and handsome flower-spikes. They should be potted *as early as possible in Autumn* in a compost of loam, sweet leaf soil, and sand, the bulbs being placed $2\frac{1}{2}$ to 3 inches below the surface and surrounded by sand; place the pots in a cold frame close to the glass with plenty of air, and give very little water until the bulbs have made foliage. In early November, before cold weather sets in, remove the pots to a sunny situation in greenhouse close to the glass where the temperature does not fall below 45° . The *Lachenalia* likes abundance of sunshine but not overmuch heat. A very beautiful effect is obtained by planting *Lachenalias* in wire hanging baskets for greenhouse decoration.

aurea , a very handsome variety with reddish brown stems and large rich golden bells, <i>early</i> , ht. 1 ft.	per doz. 10/6	each s. d
Cami , flowers deep golden, with red shading, stem red, vigorous grower, ht. 9 in.	10/6	1 0
Cawston Gem , bells yellow and green faintly tipped red and expanded at mouth, <i>early</i> , ht. 9 in.	7/6	0 8
Cowslip. See <i>Novelty List</i> , page 7.		
Garnet , very early, bells rosy scarlet, yellow, and green, tipped ruby, very showy, foliage faintly mottled, stem spotted, ht. 9 in.	7/6	0 8
glaucina , pretty metallic blue flowers, handsome foliage, very striking, ht. $\frac{1}{2}$ ft.	8/6	0 9
liliflora , a rare species, with erect spike of fragrant white expanded flowers ...	10/6	1 0
Little Beauty , bells crimson-scarlet, yellow, and green, tipped ruby, ht. 9 in.		1 6
luteola , bells citron, shaded green and red, ht. 1 ft.	8/6	0 9
<i>maculata</i> , flowers like the above, but foliage handsomely spotted, ht. 1 ft.	5/6	0 6
Nelsoni , large rich golden-yellow bells, and a reddish stem, remarkably beautiful and very free-flowering, <i>early</i> , ht. 10 in. FIRST-CLASS CERTIFICATE R.H.S.	9/6	0 10
pendula , large brilliant red bells, tipped green and purple; a grand handsome showy flower, ht. 9 in.	6/6	0 7
<i>gigantea</i> (<i>syn. Aureliana</i>), a fine improvement on the type <i>Pendula</i> ; it bears bold handsome spikes of rich deep red bells, tipped green and purple, ht. 10 in.		1 6
quadricolor , true, scarlet, yellow, and green, with broad crimson tip, an exceedingly beautiful flower, ht. 10 in.	9/6	0 10
Rector of Cawston , rich deep yellow, tipped red, ht. 9 in.	8/6	0 9
Red Cap , bells greenish yellow, base of tube flamed brilliant crimson, ht. 9 in.		2 6
Ruby , bells scarlet, yellow and green, very showy, ht. 1 ft.	8/6	0 9
superba , a very pretty variety, bells shading from salmon scarlet at top down to yellow and green, while the mouth is heavily margined crimson-maroon, ht. 9 in.	10/6	1 0
tricolor , bells scarlet, citron, and green, a very free and showy variety, ht. 9 in.	8/6	0 9

LAPEYROUSIA cruenta. See *Anomatheca cruenta*.

LEUCOJUM (Snowflake).

(Spring-, Summer-, and Autumn-Flowering.)

LEUCOJUM AESTIVUM.

Leucojum vernum, the **Spring Snowflake**, is one of the earliest and most beautiful Spring flowers, handsome in outline and of elegant drooping habit. *L. aestivum* and *Hernandezii*, the **Summer Snowflakes**, flower in April and May, and their elegant blossoms are prized for bouquets. *L. autumnale* and *roseum* are charming little graceful Snowflakes, blooming in August and September; they are best planted in pure sand. *L. trichophyllum* resembles *autumnale* in its graceful flowers, but blooms in Spring; plant in pure sand, and give cold frame treatment, keeping it well moist while in growth. All the Snowflakes delight in shady situations.

autumnale (Acis), white and pink flowers in Autumn, graceful in pots and on rockwork, etc., ht. 4 in.; grow in pure sand in shade; quite hardy. per 100, 6/6; per doz. 1s.

trichophyllum (Acis), pure white, a rare and very beautiful Spring-flowering species; grow in moist sand, give cold frame or cool greenhouse treatment.

aestivum (Summer Snowflake), a handsome plant, bearing spikes of elegant drooping white flowers in May, which are greatly prized for cutting, ht. $1\frac{1}{2}$ ft. per doz. 3/6 0 4

p. 100, 45/-; p. 100, 5/-; per doz. 9/-

„ „ Smaller bulbs. for naturalisation per 1000, 30/-; per 100, 3/6

Hernandezii (*syn. pulchellum*), elegant drooping white flowers in May, ht. $1\frac{1}{2}$ ft.

per 100, 8/6; per doz. 1/3 0 2

LEUCOJUM—continued.

- roseum** (Acis), a pretty little autumn-blooming species from Corsica, bearing elegant little rose-coloured flowers, ht. 4 in.per doz. 7/6 o 8 each—s. d
- vernum**, the **Spring Snowflake**, a favourite little early spring flower with drooping bell-shaped flowers, white with small green or yellow tip, ht. 4 to 6 in.per 100, 5/6; per doz. 10d. —
- vernum carpathicum** (*syn. Wagneri*), a robust-growing variety of the **Spring Snowflake**, with larger flowers, white prettily tipped canary-yellow or green; valuable for edgings, masses at foot of rockwork, and for naturalising in grass, etc.per 1000, 60/-; per 100, 6/6; per doz. 1/- —

BARR'S BEAUTIFUL LILIES,

For Naturalising in Flower and Shrubbery Borders, and for Greenhouse Decoration.

For chasteness and beauty of colour and form, the **Lily** stands pre-eminent amongst hardy plants, and by a judicious selection of species a continuous display of bloom can be maintained in the flower garden or greenhouse from May to October. In the flower or shrubbery border they are most effective when planted in bold groups, while isolated clumps on lawns of the taller-growing Lilies produce a fine effect. The flowers are greatly prized for cutting, as they mix well with other plants and remain fresh in water a long time.

Many amateurs have feared to introduce into their gardens these beautiful flowers, imagining that their culture was too difficult, and beyond them. This, however, is not so. There are varieties which are of the simplest culture, such as *Speciosum*, *Tigrinum*, *Elegans*, *Umbellatum*, and the old Cottage Garden Lilies—*Candidum* and *Croceum*. Others require only a little attention as to soil and position, which can be arranged for in most gardens.

General Hints on Culture.

Lilies planted out-doors.—The conditions essential to success in growing Lilies may be generally summarised thus :—**A cool rooting medium; Perfect drainage; and Shade from hot sun.**

These conditions can be readily fulfilled in the borders of Rhododendron and Azalea beds, or amongst the various subjects grown in the herbaceous and shrubbery border. In such positions the young Spring growths are protected from cold winds, and the ground is kept shaded and cool by the shade of the surrounding plants. This is especially needful in the case of those Lilies which make *stem roots*, as these are only developed freely in shade. On these roots, which are produced at the base of the stem, the flower-head largely depends for its successful development, and the bulb for its preservation. As soon as they appear a light covering of good rich soil should be given, into which they can root freely. **The chief stem-rooting Lilies are indicated in the following list by an *.** There are others which are less dependent on these stem roots, which they only produce when the bulbs are planted on rich soil and in shade.

In preparing the ground for Lilies loosen the soil to a depth of 2 feet or more, and add or fill in the necessary compost (*see notes below*). Plant the bulbs 2 to 3 inches deep, surrounding and covering them with sand, and then top-dress with a compost of light soil and well-decayed manure. As growth advances a mulching of light rich soil should be occasionally given, and during the growing period the plants should be freely watered. In late autumn cut down the old flower-stems and give a light covering of leaves or cocoa fibre.

The *Bog or Swamp Lilies*—like *Superbum*, *Canadense*, and *Pardalinum*—revel in plenty of moisture and are admirable subjects for the sides of brooks, rivulets, ponds, etc.

Lilies in Pots.—Any one with an unheated greenhouse can easily have a very beautiful show of Lilies in pots during the summer months. The varieties specially recommended for this culture are *Auratum*, *Speciosum*, *Tigrinum*, *Chalcedonicum*, *Umbellatum*, *Elegans*, *Testaceum*, *Hansonii*, *Henryi*, *Giganteum*, *Brownii*, *Brownii var. odorum*, *Longiflorum*, *Krameri*, and *Rubellum*.

In potting use a compost of fibrous loam and sweet decomposed leaf soil, with plenty of coarse sand or a mixture of good peat, loam, and sand. *See that the drainage is perfect and that the inside of the pot is clean before potting.* Pot firmly, barely covering the top of the bulb, and leaving room to add more soil when the surface roots appear. Select a situation out of doors, protected from the afternoon sun, and stand the pots on a bed of ashes raised above the general level to avoid stagnant moisture, and make firm to prevent the entrance of worms; then cover with 6 inches of cocoa-fibre or old leaf soil to keep off excessive rains. When top growth begins to show above the covering, remove the pots to a cold frame, pit, or greenhouse, and start giving water sparingly; a little *clear weak liquid manure given twice a week* when the flower-buds are well advanced will greatly assist in the development of fine blooms. A north wall or hedge is a suitable situation for starting the bulbs. If very early flowers are required the plants may be transferred from the cold frame into a *gentle* heat, but must be kept as near the glass as possible to prevent their getting drawn. Shade should be given to the lower portion of the stems to induce free stem-roots, and these should be top dressed as they appear. Give air freely, and fumigate if required. When coming into bloom a little weak manure-water will be of great assistance to the plants.

To those desiring further information regarding Lilies, we commend the following books: Dr. Wallace's "**Notes on Lilies**" (2/9 *post-free*), Miss Jekyll's "**Lilies for English Gardens**" (8/10 *post-free*), "**The Book of the Lily**" (by William Goldring), 2/9 *post-free*; also Vol. XXVI. of the Royal Horticultural Society's Journal containing a report of the Great Lily Conference at Chiswick, July 16, 1901.

LILIES—continued.

☛ The majority of Lilies are not ready for dispatch before the beginning of November; a few sorts, however, are ready earlier, such as Candidum, Croceum, longiflorum, etc., while some of the Japanese imported varieties do not arrive until December. Orders for Lilies will therefore be executed, if necessary, in two or more parts.

Soils and Situations Recommended for Different Lilies

|| Indicates those Lilies of easiest culture, being strong free growers thriving in most soils. Where soil is very dry and poor, add loam and peat, or leaf soil; where heavy and damp, add sand and leaf soil. All require good drainage and plenty of moisture while in growth.

Ω Indicates those Lilies requiring a good friable soil, not too dry, and the addition of a little peat is advisable. The lower part of the stems should be kept in shade.

¶ Indicates those Lilies delighting in shady and moist situations, sheltered from strong winds. A well-drained peat soil, where there is bottom moisture for the bulbs to root into, is recommended. Where a brook, stream, or pond is available, they may be planted at the margins, where the bulbs can remain moderately damp, and the roots find all the moisture they require below. In planting cover and surround bulbs with sand.

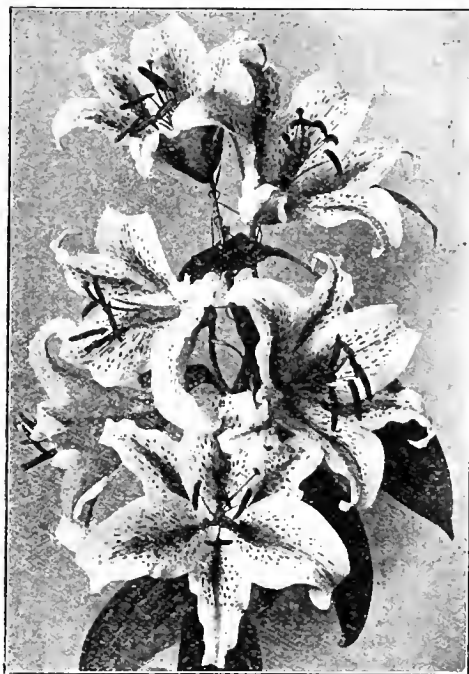

δ Indicates the chief *stem-rooting* Lilies.

BARR'S SELECTIONS OF BEAUTIFUL LILIES.

For Greenhouse decoration,	25 in 25 beautiful named vars., £1 1s., £1 10s., & £2 2s.

☛ For several beautiful New Lilies, see Novelty List, page 7.

N.B.—For the interest of buyers we have added, after the name, the plant's native country.

LILIUM AURATUM.

δΩ **Auratum** (The White Golden-rayed Crimson-spotted Hill Lily of Japan), ht. 4 to 6 ft. This is indeed the **Queen of Lilies**, and should have a place in every garden and greenhouse. It commences to bloom in August and continues on into September. It is of simplest culture and perfectly hardy. Those who have beds or borders of Rhododendrons should plant this grand Lily freely amongst them for a succession of bloom. Growing amongst Paeonies, and along the margins of evergreens, groups of **L. auratum** (6 to 12 bulbs in a clump, planted 9 inches apart), produce a grand effect. As isolated subjects on large lawns, groups of **Lilium auratum** look very handsome and stately. A situation should be chosen where the plants are sheltered from cutting winds and screened from the midday sun; on slopes, in a free soil, moist but not wet, this Lily does well, and makes a fine effect.

We are expecting our first consignment of this beautiful Lily to arrive early in December from Japan, and we are booking orders for delivery immediately on arrival, at the following prices. The larger-sized bulbs produce the most flowers.

δΩ Auratum ,	Extra Large Bulbs, 12 for 15/-; 25 for 28/-; 50 for 54/-; 100 for 105/-
"	Splendid Large Bulbs, 12 for 10/6; 25 for 20/-; 50 for 38/-; 100 for 70/-
"	Good-sized Bulbs, 12 for 7/6; 25 for 14/-; 50 for 26/-; 100 for 50/-
"	Smaller Bulbs, 12 for 5/6; 25 for 10/-; 50 for 19/-; 100 for 36/-
"	A few Special Monster Bulbs, 2/- & 3/- each.

Annuals for Autumn Sowing.

Special List of Hardy Annuals suitable for September sowing in the open for early Spring display sent on application.

LILIES—continued.

- ♂ **Auratum giganteum.** See Novelty List, page 7. each—s. d
- „ **pictum**, large white flowers, beautifully spotted crimson, and petals tipped red, very showy, ht. 4 ft.per doz. 21/- 2 0
- „ **platyphyllum**, handsome flowers of enormous size, great substance, with broad white petals, spotted crimson, bold handsome foliage, and sturdy habit, ht. 5 to 10 ft.*Strong bulbs*, per doz. 21/- 2 0
- „ „ *Extra strong bulbs* „ 27/6 2 6
- „ **rubro-vittatum**, large pure white flowers, with a broad deep crimson band down the centre of each petal; a Lily of great beauty and the admiration of all who see it, ht. 3 to 4 ft.*Strong bulbs*, per doz. 27/6 2 3
- „ „ *Extra strong bulbs* „ 36/- 3 3
- „ **Wittei**, large pure white unspotted flowers, with golden band down each petal, chaste and beautiful, ht. 3 to 4 ft. *Extra strong bulbs*, per doz. 36/- 3 3
- || **Batemani** (*Japan*), a beautiful Lily with rich glowing apricot-red flowers in *August* and *September*, ht. 3 ft.per doz. 8/6 0 9
- § **Bulbiferum true** (*Central Europe and South-Eastern Scandinavia*), bearing in June umbels of brilliant orange-red flowers and producing bulbils in the axils of the leaves, ht. 2 ft.per doz. 7/6 0 8

LILIUM BROWNII
(Very much reduced).

♂ **Brownii** (*China and Japan*), a very beautiful Lily, producing, in July, handsome trumpet-shaped flowers nearly to inches long, tips of petals reflexing slightly, pure white inside, with brown anthers, outside chocolate-brown, ht. 3 ft.; valuable for borders or pots, and of easy culture. (See illustration.)

Extra strong bulbs, per doz. 25/- 2 3

♂ **Brownii var. odorum** (*syn. japonicum colchesterense*) (*Central China*), a rare Lily bearing handsome fragrant flowers in July, chrome-yellow changing to creamy white and streaked outside very dark chocolate-brown, ht. 3 ft. FIRST-CLASS CERTIFICATE R.H.S.1/6 & 2 0

|| **Callosum** (*Japan*), an elegant Lily bearing on slender stems several characteristic orange-scarlet flowers with reflexing petals, ht. 2 ft.per doz. 15/- 1 6

¶ **Canadense** (*N.-E. America*), a very graceful Lily, producing in July pendent bell-shaped flowers ranging from yellow to orange, heavily spotted crimson-black, ht. 3 ft.per doz. 7/6 0 8

„ **flavum**, soft yellow, heavily spotted crimson-black, ht. 3 ft.per doz. 12/6 1 3

„ **rubrum**, red, inside orange spotted black, ht. 3 ft. p. doz. 10/6 1 0

|| **Candidum**—The **Snow-White Madonna Lily** or **COTTAGER'S WHITE GARDEN LILY** (*South Europe, etc.*). This Lily likes a good deep soil, not too dry, and should be left undisturbed for years. *Bulbs supplied from September to December only.* Before planting dust the bulbs with dry flour of sulphur, and this will aid in keeping away disease. After planting give a mulching of decayed stable manure

„ „ „ *Extra strong healthy bulbs*, per 100, 25/-; per doz. 3/6 —

„ „ „ *Strong healthy bulbs* „ 21/-; „ 2/9 —

„ „ „ *Smaller bulbs for naturalising* „ 16/6; „ 2/4 —

¶ **Carniolicum** (*Lombardy, Dalmatia, etc.*), a pretty June-flowering Austrian species bearing nodding vermilion-coloured flowers with reflexed petals, ht. 3 ft. 1 6

|| **Chalcedonicum**—The **Scarlet Turk's Cap Lily** OF **COTTAGE GARDENS** (*Greece, etc.*), flowers intense deep scarlet, blooming in *July*, very showy and effective, ht. 3 ft. per doz. 10/6 1 0

„ „ „ *Extra large bulbs* „ 15/- 1 6

„ **Heldreichi**, a remarkably handsome form with large flowers of great substance, brilliant scarlet, ht. 2½ ft.per doz. 24/- 2 3

Colchicum. See Monadelphum.

♂ **Columbianum** (*N.-W. America*), the **Oregon Lily**, a very graceful species, bearing from July to August several small fragrant flowers of a brilliant deep orange, spotted crimson, resembling a miniature *Humboldtii*, ht. 3 ft.per doz. 12/6 1 3

„ „ „ *Extra strong bulbs* „ 18/6 1 9

LILIES—continued.

each—s. d.

- ♂ **Concolor** (*China and Japan*), a very lovely little Lily, bearing in July two to three erect fiery glossy scarlet flowers with dark red spots, ht. 1 ft. FIRST-CLASS CERTIFICATE R.H.S. A gem for sheltered sunny nooks on rockwork where it can be kept fairly moist during dry weather; it makes also a charming pot-plant for the greenhouseper doz. 7/6 o 8
- ♂ **Coridion** (*China and Japan*), beautiful lemon-yellow flowers, spotted purple; a very elegant little Lily, ht. 2 to 3 ft., July-floweringper doz. 12/6 1 3
- || **Croceum**—The **Cottager's Orange Lily** (*South Europe*), flowers very showy, orange, freely spotted black, produced in June; when well grown and established it attains a height of 5 to 7 ft., with a large quantity of flowers on each stem per 100, 25/-; per doz. 3/6 o 4
- „ „ „ Extra large bulbs „ 5/6 o 6
- Davuricum.** See **Umbellatum.**
- || **Elegans** (*syn. Thunbergianum*) (*Japan*), a very beautiful group of showy Japanese Lilies, *June- and July-flowering*, greatly valued for flower border and pot-culture. These are best planted in Autumn.
- „ **“Alice Wilson,”** now almost out of cultivation; we recommend in lieu **Orange Queen**, which is superior.
- „ **alutaceum Prince of Orange**, clear apricot-orange, spotted black, a valuable dwarf showy Lily for flower-beds and massing in front borders, ht. 1 ft. per doz. 5/6 o 6
- „ **atro-sanguineum superbum**, a very handsome variety, bearing five to six large flowers, rich dark crimson, spotted black, ht. 1½ ft.per doz. 7/6 o 8
- „ **bicolor**, flowers large, apricot-orange, flamed scarlet, a distinct and beautiful Lily, ht. 1½ ft.per doz. 6/6 o 7
- „ **E. L. Joerg**, a fine distinct Lily bearing an umbel of large flowers, brilliant orange-red shading to golden and slightly spotted crimson, handsome, ht. 2 ft. per doz. 10/6 1 0
- „ **flore-pleno** (*true*), large handsome double flowers of a rich blood-crimson, *scarce*, ht. 1½ ft.per doz. 36/- 3 3
- „ **Orange Queen**, a very handsome Lily, producing in mid-summer large orange-coloured flowers with small black spots; a strong robust grower, and very decorative in either pots or borders, ht. 15 to 18 in. AWARD OF MERIT R.H.S. 1900per doz. 25/- 2 3
- „ **Othello** (*new*), a beautiful hybrid bearing large handsome blood-red flowers tinged orange, a fine bold handsome showy Lily, ht. 1½ ft.per doz. 25/- 2 3
- „ **Peter Barr**, a grand new Lily, flowers very large, measuring 7 in. across, and of fine form, of a soft yellow colour with chamois tinge and shaded golden down the centre of each petal, almost without spots, ht. 1½ ft. AWARD OF MERIT R.H.S., July 21st, 1903per doz. 48/- 4 3
- „ **robustum**, a handsome vigorous growing variety, with bold heads of large handsome orange-yellow flowers, spotted dark crimson, ht. 2½ ft. ...per doz. 12/6 1 3
- „ **sanguineum**, flowers of medium size, rich crimson, finely spotted dark crimson, ht. 1½ ft.per doz. 7/6 o 8
- „ **semi-plenum**, large semi-double flowers, blood-crimson, ht. 1½ ft. „ 10/6 1 0
- „ **Van Houttei**, flowers rich blood-crimson, blotched with gold and spotted black, large and remarkably handsome, ht. 1½ ft.per doz. 6/6 o 7
- „ **venustum** (*syn. armeniacum*), soft rich glowing reddish orange, late-flowering, a grand showy Lily, ht. 1½ ft.per doz. 18/6 1 9
- „ „ **macranthum**, a very handsome variety, with large glowing reddish orange flowers, without spots, ht. 1½ ft.per doz. 17/6 1 8
- „ **Willie Barr**, fine large flowers of a bright orange-yellow, spotted crimson, very showy and beautiful, ht. 1½ ft.per doz. 6/6 o 7
- „ **Wilsoni**, a very beautiful variety, and latest of this section to bloom, flowers large and erect, apricot, spotted purple, with central yellow streak, very free-flowering, ht. 2 ft.per doz. 21/- 2 0
- „ **Mixed varieties**, for planting in wild gardens, shrubby borders, etc. per 100, 25/-; per doz. 3/6 —

Barr's Sweet-scented Double Chinese Pæonies for Autumn Planting.

A full Descriptive List of our magnificent collection of these beautiful hardy Pæonies sent on application.

LILIES—*continued*.

LILIAM LONGIFLORUM WILSONI.

each—s. d

- || **Longiflorum robustum**, also known as *Japonicum giganteum*, a strong and robust-growing Japanese variety, bearing large handsome white trumpet-shaped flowers of great substance; valuable for succeeding *Lilium Harrisii* and *Wilsoni*, as it blooms later, ht. 3 ft. *Strong bulbs* p. 100, 37/6; doz. 5/6 o 6
- „ „ *Extra strong bulbs* per 100, 55/-; per doz. 7/6 o 8
- „ „ *A few monster bulbs* „ 10/6 1 0
- „ **Wilsoni** (*syn. eximium*), a valuable free-flowering variety, coming in before *robustum*, and bearing 10 to 12 large handsome white trumpet flowers on a stem, ht. 3 ft.; a first-class variety for pots or borders *Strong bulbs* p. 100, 35/-; doz. 5/- o 6
- „ „ *Extra strong bulbs* per 100, 55/-; per doz. 7/6 o 8
- „ „ *A few monster bulbs* „ 10/6 1 0
- || **Marhan**, a splendid hybrid Lily, a cross from *L. martagon album* and *L. Hansonii*; it produces large elegant spikes of flowers with reflexing petals, deep yellow speckled brown and dotted crimson, June–July, ht. 3½ ft. FIRST-CLASS CERTIFICATE R.H.S. per doz. 24/- 2 3
- || **Marhan “Miss E. Willmott.”** See Novelty List, page 7.
- ¶ **Maritimum** (*California*), a beautiful distinct species, flowers bell-shaped, intense deep orange-scarlet, centre tiger-spotted crimson on a golden ground, July, ht. 1½ to 2 ft., per doz. 21/- 2 0
- || **Martagon** (*Central and South Europe*), a tall and stately Lily, bearing early in July pyramidal heads of glossy light purple reflexed flowers, spotted more or less with black, ht. 4 ft.per doz. 4/- o 5
- Ω „ **album**, one of the most beautiful of Lilies, producing in July handsome pyramidal spikes of wax-like pure white reflexed flowers, ht. 4 ft. FIRST-CLASS CERTIFICATE R.H.S.2/6, 3/6 & 4 6
- Ω „ **dalmaticum**, a stately Lily flowering in July, which when established attains a height of 5 to 6 ft. and produces 3 or 4 flower spikes, each spike surmounted by several elegant reflexed flowers, varying from rosy purple to dark purple-rose or crimson-maroon, all with a glossy surface, ht. 4 ft.per doz. 25/- 2 3
- Ω „ „ **Catani**, a remarkably handsome variety of the above, having rich dark crimson-maroon flowers shaded and spotted black, ht. 4 ft.per doz. 25/- 2 3
- Ω **Monadelphum szovitzianum** (*syn. Colchicum*) (*Caucasus and North Persia*), bearing handsome spikes of large turban-shaped flowers of great beauty, clear citron-yellow, spotted black, ht. 3 ft.per doz. 15/- 1 6
- „ *Extra Strong Bulbs* 2 0
- Ω **Nepalense** (*Nepaul*), a magnificent greenhouse Lily of striking beauty, bearing in September large flowers with elegantly reflexing petals, soft yellow, shading off inside to a rich dark maroon, ht. 3 ft.Price on application
- ¶ **Pardalinum** (*California, etc.*), stately, shade-loving Lilies, of elegant habit and producing in July heads of large, handsome, showy flowers; charming when naturalised.
- ¶ „ **type**, bright scarlet, shading to rich yellow, freely spotted purple-brown, flowers large, numerous and very handsome, ht. 5 to 6 ft.per doz. 5/6 o 6
- ¶ „ **californicum**, the finest of all, flowers rich deep orange, handsomely spotted maroon, and tipped brilliant scarlet, ht. 3½ ft.per doz. 12/6 1 3
- ¶ „ **Johnsoni**, a handsome form from British Columbia, having a strong sturdy growth with dark green foliage and very showy flowers, colour glowing crimson shading to orange, ht. 5 ft.per doz. 18/6 1 9
- ¶ „ **Michauxi** (*The Carolina Swamp Lily*), flowers crimson-scarlet, shading to yellow, spotted maroon; later-blooming than the other varieties, ht. 4 to 5 ft. per 100, 27/6, per doz. 3/9 o 4
- ¶ „ **Burbank's Hybrids and Red Giant**. See Novelty List, page 7.
- ¶ **parviflorum**, a distinct and beautiful little Lily, bearing a profusion of small elegant flowers, golden-yellow finely spotted brown and with golden anthers, ht. 3½ ft.per doz. 10/6 1 0
- ¶ **Parryi** (*California*), a very beautiful species, with large bright yellow flowers lightly spotted and of delicate perfume, July, ht. 3 ft. FIRST-CLASS CERTIFICATE R.H.S.2/6 & 3 6

LILIES—continued.

each—s. d

- ¶ **Parvum** (*California*), very distinct and showy, flowers small and bell-shaped, of a bright yellow shaded red and freely spotted, June-July, ht. 3½ ft.
Extra strong bulbs, per doz. 24/- 2 3
- ¶ „ **var. luteum**, a very pretty Lily with flowers almost cup-shaped, colour orange, dotted maroon, June-July, ht. 3½ ft.per doz. 15/- 1 6
- ¶ **Philadelphicum** (*Canada and United States*), a graceful little Lily, bearing in July charming flowers, scarlet, shading to orange, elegantly spotted black, ht. 1 ft. ...per doz. 7/6 0 8
- ¶ **Philippinense** (*Philippine Islands*), a remarkably graceful and beautiful Lily, suitable for pot culture in greenhouse; it bears on a slender leafy stem one long white trumpet-shaped flower with reflexing petals, sweetly scented, ht. 2 ft., very rare per doz. 8/6 0 9
- ¶ **Pomponium, true** (*Lombardy, etc.*), a beautiful June-flowering Lily, with very graceful foliage, flowers reflexed and of a rich sealing-wax scarlet colour, ht. 2 to 3 ft. ...per doz. 7/6 0 8
- ¶ **Pyrenaicum flavum** (*Pyrenees*), bearing elegant spikes of numerous yellow flowers, spotted black, June-flowering, ht. 3 ft.per doz. 5/6 0 6
- ¶ **Roetzlii** (*true*), a rare Lily from the Pacific coast, bearing in June an elegant raceme of brilliant orange-red flowers spotted purple and with reflexed petals, ht. 3 ft. ... per doz. 17/6 1 8
- δ **Rubellum**, one of the most beautiful of recently discovered hardy Japanese Lilies. The growth is slender like that of *Krameri*, while the flowers are of distinct elegant form and a delicate pale rose, with golden anthers; it has been found to thrive best out of doors in a partially shady situation in a compost of loam, leaf soil, and stones; it makes a lovely pot-plant (2 or 3 bulbs in a pot) and may be gently forced into bloom by end of May, ht. 1½ ft. At the R.H.S. gardens, Wisley, this charming little Lily has done well growing under trees with a surface covering of mossper doz. 10/6 & 15/-; 1/- & 1 6
- δ **Speciosum** (*syn. lancifolium*) (*Japan*), a remarkably beautiful section of Lilies flowering in late summer and early autumn; the flowers are large and handsome with reflexing petals and last a long time in water when cut.
„ **album**, handsome white flowers of firm texture, ht. 3 ft.
Strong bulbs, per doz. 7/6 0 8
- „ „ **Crown Princess**, a very floriferous variety, bearing a large number of fine white flowers, ht. 3 ft. AWARD OF MERIT. p. doz. 9/6 0 10
- „ „ **Kraetzeri**, extremely beautiful large white flowers of great substance, with dark orange-coloured anthers, ht. 3 ft.
Strong flowering bulbs, per doz. 7/6 0 8
- „ „ „ „ Extra strong bulbs..... „ 10/6 1 0
- „ „ „ „ A few monster bulbs 1 6
- „ „ **novum**, see **punctatum album**.
- „ **cruentum**, a dwarf late-flowering variety of **Melpomene**, with handsome richly coloured flowers; a good pot plantper doz. 18/- 1 8
- „ **magnificum** (*new*), a grand Lily introduced in 1903 from a new district in Japan. It resembles the favourite **Melpomene** but blooms earlier, is richer in colour and has longer and broader petals; the foliage is of a rich dark green, while the flowers are of great substance and borne 10 to 20 on a spike. AWARD OF MERIT R.H.S.per doz. 10/6 & 15/-; 1/- & 1 6
- „ „ „ „ Extra large bulbs 2 0
- „ **Melpomene**, one of the richest coloured of this group, bearing large handsome flowers of stout substance, dark crimson, heavily spotted purple-crimson, and margined white, ht. 3 ft.per doz. 7/6 0 8
- „ „ „ „ Extra strong bulbs „ 10/6 1 0
- „ „ „ „ A few monster bulbs..... 2 0
- „ **punctatum**, white spotted pink, anthers yellow, beautiful, ht. 3 ft., per doz. 6/6 0 7
- „ „ **album** (*syn. album novum*), the finest white variety, of robust growth, with handsome broad foliage, flowers very large, snowy white, with yellow anthers; a grand Lily which we can strongly recommend, ht. 3 ft. AWARD OF MERIT R.H.S.per doz. 18/- 1 8
- „ **purpureum**, a very fine variety, with abundance of large purple-rose flowers, heavily spotted deep crimson-purple, strong grower, ht. 3 to 5 ft. ...per doz. 6/6 0 7
- „ „ „ „ Extra strong bulbs „ 9/- 0 10
- „ **roseum**, white suffused and spotted delicate light rose, pretty, ht. 3 ft.
Extra strong bulbs, per doz. 5/6 0 6
- „ „ **multiflorum**, a fine variety, resembling **Melpomene** in growth, flowers of good form, suffused and spotted rose on a white ground, early and very free-flowering, ht. 3 ft....per 100, 50/-; per doz. 7/- 0 8
- „ **rubrum**, suffused and heavily spotted crimson, on white ground, ht. 3 ft.
Extra strong bulbs, per 100, 35/-; per doz. 5/- 0 6
- „ **Schrymakersii**, a fine early and free-flowering form of **rubrum**, bearing an abundance of deep rose flowers spotted purple, ht. 3 ft.per doz. 7/6 0 8

LILIES—continued.

each—s. d

♂ **Sulphureum** (*syn. Wallichianum superbum*), a grand Lily. See Novelty List, page 7.

SPIKE OF LILIUM SUPERBUM.

♂ **Superbum** (*Eastern United States to Canada*), a very showy bog-loving Lily, with flowers orange to crimson, spotted rich brown, and elegantly recurved, stately in growth, late Summer-flowering; ht. 4 to 7 ft. (See Illustration)

per doz. 6/6 o 7

Szovitzianum. See *Monadelphum Szovitzianum*.

♂ **Tenuifolium** (*Siberia*), a very graceful little Lily, bearing in early June on slender stems numerous showy glossy scarlet flowers, ht. 1½ ft.per doz. 8/6 o 9

♂ **Testaceum** (*syn. excelsum*), bearing from June to July very beautiful large handsome flowers of a lovely apricot colour, with showy scarlet anthers, delightfully fragrant, vigorous grower, ht. 4 ft.per doz. 21/- 2 o
" Extra strong bulbs " 30/- 2 9

Thunbergianum. See *Elegans*.

♂ **Tigrinum**—the *Tiger Lily* (*China and Japan*), a remarkably handsome section, with abundance of large showy brilliantly coloured flowers, lighting up the garden in August and September. All very hardy vigorous growers.

" **Fortunei**, having a woolly stem and producing on bold branching heads up to 20 rich orange-scarlet flowers, spotted crimson-brown, ht. 4 ft. per 100, 17/6; per doz. 2/6 o 3

" " **flore-pleno**, double orange-scarlet flowers, lasting long in bloom, ht. 4 ft.

per 100, 17/6; per doz. 2/6 o 3

♂ **Tigrinum Fortunei giganteum**, a grand robust variety of *Fortunei*, growing taller and bearing more flowers, ht. 6 ft.

per 100, 42/-; per doz. 5/6 o 6

" " " **Very large bulbs** " 7/6 o 8

" " " **flore-pleno**, flowers very large, double orange-scarlet, handsome, ht. 6 ft.

Extra strong bulbs, per doz. 7/6 o 8

" **splendens**, very handsome, with large pyramidal heads of bright fiery orange-scarlet flowers, covered with large crimson-brown spots, ht. 6 ft.

per 100, 12/6; per doz. 1/9 o 2

♂ **Umbellatum** (*syn. Davuricum*), a very showy section of Lilies, bearing in June large handsome flowers; very effective when grouped in shrubbery and flower borders, also good pot plants.

" **erectum**, rich cerise-scarlet, shading to yellow, ht. 2½ ft., p. 100, 27/6; p. doz. 3/9 o 4

" **Incomparable**, intense rich crimson, freely spotted, a handsome showy variety, ht. 2 ft.per 100, 27/6; per doz. 3/9 o 4

" **Sappho**, scarlet, shading to orange, moderately spotted, ht. 2 ft. " 5/6 o 6

" **Fine Mixed Varieties**, ht. 2 to 3 ft.per 100, 18/6; " 2/8 —

FINE NEW HYBRIDS

(LILIUM UMBELLATUM × LILIUM ELEGANS.)

aurantiacum multiflorum, orange-yellow petals, tipped orange-red per doz. 7/6 o 8

Cloth of Gold, a beautiful variety with fine golden-yellow flowers almost without spotsper doz. 15/- 1 6

Sensation, bearing handsome large flowers of a vivid orange-red, very fine " 7/6 o 8

Tottenhami, very handsome heads of flowers, bright yellow spotted red, distinct and fineper doz. 6/6 o 7

Wallichianum superbum. See *Sulphureum*.

♂ **Washingtonianum purpureum** (*Oregon*), a fine variety bearing in abundance large handsome sweet-scented flowers, white tinged and spotted a vinous purple, and changing ultimately to a rich deep purple, ht. 3 to 4 ft. We offer this in preference to the type (*L. Washingtonianum*) as being a more reliable grower. Plant the bulbs with the top 6 in. deep in fibrous loam in partial shade. 2 o

× LILY OF THE VALLEY,

For forcing, and making plantations out of doors.

The **Berlin Forcing Crowns** offered below we recommend for general forcing, to come in after Christmas. For flowering before and at Christmas the **Retarded Crowns** should be used. For outdoor culture the **Planting Crowns** are recommended.

DIRECTIONS FOR FORCING.

Plant 15 to 20 crowns in a 5-inch pot, shaking in a little light soil amongst the roots, until they are tightly potted; leave the crowns free above the soil and a little below the rim of the pot. Place on bottom heat in a *moist atmosphere*, with a temperature of 80 to 85 degrees (if forced in March a temperature of 70 to 75 degrees will be sufficient), and cover the crowns with a little cocoa fibre or moss, which remove when top growth is showing. *Tepid water* should be frequently given, care being taken that it *penetrates to the centre of the clump*. To encourage simultaneously the development of flower and foliage, keep a flower-pot inverted over the crowns, until flower and foliage have made some progress, when gradually admit light. A *dry atmosphere*, or an *insufficient supply of water at the roots*, will cause the crowns, technically speaking, to go "blind." Where large quantities of Lily of the Valley blooms are required for cutting, the crowns should be planted rather thickly in boxes and receive the treatment described above.

OUTDOOR CULTURE OF LILY OF THE VALLEY.

Out-of-doors the Lily of the Valley likes a partially shaded and moist situation. The best results are obtained on a shady border against a wall, placing the crowns 6 to 9 inches apart and leaving them to establish themselves. The soil should be a good loam enriched with manure and a top dressing of old manure should be given annually. The plants should not be allowed to remain more than three years in one spot.

- × **Barr's Finest Berlin Forcing Crowns**, of finest selected quality, suitable for general early forcing.....per 1000, 60/-; per 100, 6/6
 - × **Barr's Improved English "Alexandra" Crowns**, bearing sturdy spikes well clothed with large handsome bells; this strain is *specially suited for outdoor culture*, but may also be potted and very slowly forced in February or March (not earlier).....per 100, 8/6; per doz. 1/3
 - × **Fine Selected Berlin Planting Crowns**, for outdoor beds, and naturalising in woods, etc.....per 1000, 42/-; per 100, 4/6
 - × **Strong selected clumps**, for outdoor planting or slow forcing in pots.
per doz. 10/6; each 1/-
 - × **Fortin Grand Giant Strain**, a very beautiful strain with remarkably large handsome bells on long sturdy stalks; the finest of all Lily of the Valley. The **flowering crowns** offered may be potted and brought on *very slowly* under glass, but they must not be potted or boxed up before March; ordinary forcing will cause them to go *blind*. **Flowering crowns**, per 100, 17/6; per doz. 2/6
- " " Planting crowns (*specially recommended*) " 10/6; " 1/6

RETARDED LILY OF THE VALLEY,

Suitable to force for Autumn, Winter and Summer flowering.

Crowns supplied from July to December and March to June.

FORTIN'S GIANT LILY OF THE VALLEY.

The earlier plantings of the **Berlin Retarded Crowns** will give bloom in about three weeks, but the crowns started in November and December require a little more time. It is necessary that they be planted *as soon as received*, and grown on rapidly without any check. In June, July, and August all that is needed is to place them in a cold frame, and they come along quickly with very little attention. Later on, however, when the nights become cool, the temperature must be raised to that of the day. Failures sometimes occur with these retarded crowns in October, November, and December because they are not given the warmth they require at night.

The plants should be kept fairly dry overhead, and a warm moist atmosphere should be maintained. As the retarded crowns make a vigorous foliage it is advisable to remove one out of three leaves, as this will assist the development of the flower spike.

The **Fortin's Giant Retarded Crowns** take a few days longer to develop their flowers than the *Berlin Retarded Crowns*.

Finest Berlin Retarded Crowns, supplied as required from *July to December and March to June*per 1000, 80/-; per 100, 9/-

Finest Selected Fortin's Giant Retarded Crowns, supplied as required from *July to December and March to June*...per 100, 21/-

LISSOCHILI from the Transvaal, beautiful terrestrial orchids collected on the open veldt in the Transvaal, and comprising different varieties, white and rose, yellow, and intermediate tints, all beautiful. Culture as for *Nerines* is recommended, the roots being kept dry except when in growth. **Mixed shades** 2 6

× **LYCORIS**, handsome bulbous plants from China and Japan.

aurea, a greenhouse bulb of great beauty, from China, bearing in October lovely umbels of golden-yellow flowers of elegant outline, ht. 1½ ft. Grow in a temperature of 65° to 70°, and while at rest in summer keep slightly dampper doz. 21/- 2 0

radiata alba, a fine introduction from Japan, bearing on stout stems large umbels of spreading white flowers with a slight tinge of primrose at base of segments; a noble plant for the greenhouse, or out of doors under a south wall, ht. 1½ ft.per doz. 21/- 2 0

sanguinea, bearing from May to June umbels of 5 to 6 brilliant orange-red flowers, for greenhouse or south walls, ht. 1½ ft.per doz. 21/- 2 0

squamigera (*syn. Amaryllis Halli*), bearing in July umbels of 5 to 6 pretty pink flowers, with petals 3 to 4 in. long, the lower part being bright yellow, fragrant, ht. 2 ft.; for greenhouse or south wallsper doz. 21/- 2 0

” **purpurea**, bearing in July umbels of 6 to 7 flowers like the above, but shaded brilliant purple, ht. 2 ft.; for greenhouse or south walls, per doz. 10/6 1 0

× **MALVASTRUM Gilliesii** (*Modiola geranoides*), a charming dwarf hardy rock-plant, profusely covered with crimson-purple flowers all the summer, ht. ½ ft.per doz. 6s. 6d. 0 7

× **MEDEOLA asparagoides** (*Smilax*). See *Asparagus medeoloides*.

METHONICA superba. See *Gloriosa*.

× **MICHAUXIA campanuloides** (*Michaux's Bell-flower*), a stately plant for dry south borders, bearing in summer branching spikes of large rosy white blooms like *Passion-flowers*, ht. 3 ft.per doz. 4/6 0 5

MILLA (*Triteleia*).

× **biflora**, a beautiful Mexican species, bearing in August large pure white flowers of great substance, ht. 1 ft; the bulbs should be kept dry during winter and be potted up in early spring or planted out in March in a well-drained and sunny situationper doz. 5/6 0 6

uniflora (*Spring Star Flower*), a charming little hardy plant from Buenos Aires; flowers white, shaded blue, of delicate fragrance, ht. ½ ft. Naturalised on grassy banks or on rockwork, this plant produces a lovely effect during April and May; it is also valuable for small beds and edgings. By gentle forcing in pots it may be had in bloom from January to February. A pretty room decoration can be obtained by growing *Milla uniflora* in saucers or bowls of live sphagnum moss.

per 1000, 18/6; per 100, 2/-; per doz. 4d. —

” **violacea**, differs only from the above in the flowers being porcelain-blue, striped violet, ht. ½ ft.per 1000, 15/6; per 100, 1/8; per doz. 3d. —

× **MONTBRETIA**, a family of most decorative hardy bulbous plants of elegant growth, and producing freely in early August graceful spikes of gorgeously coloured flowers, which are of the greatest value for cutting, lasting long in water and mixing well with all kinds of foliage. They grow freely in any ordinary flower-border enriched with manure, but prefer a sunny situation. As pot-plants they are charmingly graceful. Plant outdoors November to March, and the earlier plantings cover lightly with litter.

Pottsii, graceful branched spikes of medium-sized brilliant-vermilion scarlet flowers remarkably showy, ht. 2 ft. 25 0...2 9...0 5

Pottsii superba, brilliant-glowing vermilion, inner part of flower a rich golden colour, ht. 1½ ft. 27 6...3 0...0 5

„ Tragedie. See <i>Novelty List</i> , page 7.				

MORPHIXIA *paniculata* (*syn.* *Ixia longiflora* and *paniculata*).

Lovely little bulbous plants with the same graceful habit as the *Ixia*, but dwarfer, the flowers being long and tubular; they come into bloom later than the *Isias*, and continue in flower a long time. These little gems should be given choice sunny spots on rockwork or front border.

Mixed colours, buff and brick rose, lemon shaded buff, rose and white, per 100, 14/6; per doz. 2/-

MUSCARI (Grape, Starch, Musk, and Feathered Hyacinths).

These lovely Spring Flowers require no special culture or soil. Naturalised on rockwork and grassy banks they look very beautiful, while as edgings and massed in the flower border they are most charming, and continue a long time in bloom, ht. 4 to 6 inches. We can strongly recommend them all for naturalisation.

“**Heavenly Blue**,” this lovely variety was sent us some years ago from Trebizond; the colour is of the brightest and richest shade of gentian-blue imaginable, and large masses produce a wonderful effect in the garden from the end of March to May; the flowers have a delightful fragrance, and are very valuable for cutting, having long stalks, and remaining fresh in water a long time. Awarded a Certificate of Merit by the Royal Botanic Society. (See *Illustration*, page 9) ...per 100, 60/-; per 100, 6/6

POLYANTHUS NARCISSUS, PAPER-WHITE "SNOWFLAKE."

NARCISSUS POLYANTHUS,
OR NOSEGAY DAFFODILS.

The *Polyanthus Narcissi* or *Nosegay Daffodils* produce large heads of sweet-scented flowers, and are specially adapted for Winter and Spring decoration in pots and jardinettes, etc. The culture is the same as for *Hyacinths*. For flower beds and mixed borders they are great favourites, and produce a charming effect. Plant in October or November, and at the approach of winter give a light covering of long litter or other material to keep off severe frosts; remove the covering in March.

Where flowers are in demand from November to January, the *Paper White* "Early Snowflake" and *Double Roman Narcissi* are of great value for forcing with the *Roman Hyacinths* (see *Culture*, page 1).

Barr's Selections of
Polyanthus Narcissi or Nosegay
Daffodils.

(These selections do not include *Paper White* or *Double Roman Narcissi*).

NARCISSUS POETAZ—NEW HYBRID POLYANTHUS NARCISSI.

(Hybrids of *Polyanthus Narcissi*, best forms, and *Narcissus poeticus ornatus*).

A very decorative new class of **Nosegay Daffodils** or **Polyanthus Narcissi**, growing taller than the old varieties, with a less stiff habit, and a looser head of flowers, which are larger and more elegantly formed. They also have the merit of being hardy, and may be naturalised like the true Daffodils. Besides being good border plants they are valuable for culture in pots and jardinetts, and will bear gentle forcing. The flowers of these new Narcissi are all delightfully fragrant, and will be found of great value for vases or bouquets.

THE SACRED, OR GOOD LUCK LILY of China and Japan.

Called by the Chinese "Jos Flower," or "Flower of the Gods," and "Water Fairy Flower."

BOWLS OF THE CHINESE SACRED LILY.

This species of *Polyanthus Narcissus*, which we annually import from Northern China, is prized for the abundance of its flowers and its marvellously rapid growth. The flowers are white, with yellow cup, and very fragrant; they are mostly single, but a few doubles are sometimes found amongst them. Each bulb produces several flower-spikes, bearing many flowers. In China and Japan the bulbs are grown in the living-rooms in fancy bowls filled simply with pebbles and water, and the natives compete with one another in growing the finest specimens for their New Year's Festival, successful culture being regarded as an emblem of "Good Luck." The bulb in this country can be grown as successfully as in China, and it is most interesting to watch its rapid growth, which is about 20 inches in forty days; place in a sunny window by day and on a table near the centre of the room by night, as frost destroys the flower-buds. The natural atmosphere of a warm greenhouse is of course most suitable, and we can

strongly recommend this flower for CHRISTMAS FORCING. *Fuller particulars of culture sent with the bulbs.* In Cornwall and the warmer parts of the South of England the bulbs after blooming may be planted out to a sunny corner of the garden and covered with heather until the spring; they should there be left to establish themselves, and if protected slightly each winter, give an abundance of early flowers.

CHINESE SACRED LILY—continued.

Orders booked for immediate delivery on arrival, which we expect to be early in October.

each—s. *d*

NERINE, greenhouse bulbous plants of remarkable beauty. Established in pots they produce annually their handsome umbels of bloom. In potting use a rich sandy loam soil, encourage a free foliage growth during Winter, and in Spring gradually reduce watering so that the bulbs may go to rest. In August they should be started again into growth for autumn flowering.

Bowdeni, a new species from Cape Colony, and the finest of the section. It bears large umbels of flowers 3 to 4 inches across; pink with a dark rose-coloured line running down each petal. AWARD OF MERIT R.H.S.

corusca major, a handsome variety of *sarniensis*, producing a close umbel of brilliant fiery orange-scarlet flowers with protruding scarlet stamens.

flexuosa alba. See Novelty List, page 7.

Fothergilli major, a grand plant, producing in early autumn large umbels of handsome crimson-scarlet flowers, ht. 1½ ft.per doz. 24/-

marginata.
pancratioides. } See Novelty List, page 7.

sarniensis (Guernsey Lily), a most brilliantly coloured Autumn flower of elegant form; colour vivid crimson-scarlet, sparkling in the sun as if bespangled with gold, ht. 1 to 1½ ft.

Bulbs with flower-bud to bloom this Autumn will be supplied if possibleper doz. 10/6

undulata (*syn. crispa*), rose-coloured flowers, petals elegantly curled, a little gem for

RNITHOGALUM (Star of Bethlehem), very pretty hardy bulbs, flowering in Spring and

ORNITHOGALUM (*Star of Bethlehem*), very pretty hardy bulbs, flowering in Spring and early Summer. **ARABICUM** and **AUREUM** should either be grown in pots or planted in a warm situation close to a south wall, at a depth of 6 inches. **PYRAMIDALE**, **NUTANS**, and **UMBELLATUM** are charming plants for naturalising in woodlands, meadows, etc.; the two latter will thrive in dense shade where few other plants will grow.

arabicum, handsome white flowers in June, with glistening black central boss and yellow anthers. Well-grown specimens produce heads bearing as many as 20 flowers, each measuring 2 inches across. Plant on warm sunny south borders, and slightly protect during winter; by *slight* forcing it may be had in bloom by Easter, ht. 1½ ft. After flowering the bulbs should be well ripened off, if out-of-doors, by placing a hand-light over them, or if in pots by exposing them to full sun.....Guernsey-grown bulbs, per doz. 2/6

PUSCHKINIA libanotica compacta (Lebanon Squill), a beautiful little April-flowering bulb, prized for the permanent flower border and for rockwork; it is also a lovely indoor pot-plant (6 bulbs in a pot); the flowers are white, shaded and striped soft clear blue, ht. 6 inches
per 1000, 42/-; per 100, 4/6; per doz. 8d.

RAMONDIA pyrenaica alba. See Novelty List, page 8.

RANUNCULUS, Turco-Persian, Turban and Persian, ht. $\frac{3}{4}$ ft.

Nothing produces a brighter or more gorgeous effect in May and June than beds of Ranunculus; the flowers are all good for cutting, and the culture is very simple. They thrive in any ordinary garden soil, but should have protection in spring from sharp winds.

CULTURE.—Plant the **Double Turban Ranunculi** from November to March (the earlier the better), and the **Turco-Persian and Persian** during February and March. Set the tubers 3 or 4 inches apart, pressing them firmly into the soil, *claws downwards*, and covering them with sand, then with soil; keep the crown of the tuber two inches under the surface. After planting cover the ground with *cut heather, or other light material*, which remove when the plants appear above ground. In April a slight mulching of well-decayed manure will be found beneficial, and during dry weather the plants should be given abundance of water. If grown as pot-plants put three tubers in a 4-inch pot, and plunge out of doors for a time.

RANUNCULUS, Double Turban or Turkish for Bedding.

The flowers of the **Turban Ranunculus** are large, rose-like, and self-coloured. In beds, ribbons, and masses in the borders, the rich *yellow*, bright *orange*, brilliant *scarlet*, beautiful *rose-carmine*, and pure *white* flowers are very effective in spring.

RANUNCULUS—Single Scarlet from Palestine, a beautiful variety found wild in Palestine; flowers single, brilliant vermilion to orange-scarlet, with prettily crinkled petals and a black central boss; a very showy plant for beds and flower borders. Plant out of doors in February or March, or the roots may be potted up earlier and gently forced

per 100, 7/6; per doz. 1/3
* **RICHARDIA (Calla or Arum Lily)**, a charming family of greenhouse plants. **R. africana** (*Æthiopica*) is much prized for its beautiful large white flowers; this and its varieties should be grown out of doors during Summer and be brought into the greenhouse at the approach of Winter. The other species should be kept dry, away from frost during Winter, and be started in a *gentle* bottom heat in February or March. They may then be grown on in pots for greenhouse decoration or planted out of doors in a sheltered position in May. In the latter case the natural soil should be taken out to a depth of 9 inches, and be replaced by a very rich compost, as these plants are gross feeders. Abundance of water should be given as growth proceeds. **Albo-maculata**, **aurata**, **hastata** and **Mrs. Roosevelt** may also be planted out of doors in a dry state in April for Summer-flowering.

per 100, 12/6; per doz. 1/9 —

Verna, lovely little heads of lilac-blue flowers; charming for naturalising on rockwork, etc., ht. 3 in. per doz. 3/6 0 4

Any other species in commerce not enumerated above can be supplied if wanted.

SCILLAS (Wood Hyacinths) — May-flowering. Our native species (*Scilla nutans*), with its long pendent bells, abounds in most parts of the country, and many suppose it to be the “Culver keys” referred to by Izaak Walton. The fine Spanish varieties (*S. hispanica*) have erect flower-spikes and open campanulate flowers. *Scilla patula* and its varieties have a robust tall habit with large campanulate open flowers. All are very effective in flower and shrubby borders, and most valuable for wild gardens and woodlands, where they should be largely naturalised; they seed freely and quickly establish themselves. They also make charming pot-plants, and may be forced into bloom by March. The white varieties are greatly in demand to cut for table bouquets and vases. **Wood Hyacinths** succeed in shady flower borders and bare shady places, and odd corners which often have a desert-like appearance in the flower garden can by their use be rendered bright and cheerful. They will also thrive under fir and pine trees where few other plants will grow. Plant 6 inches deep to obtain fine flower-spikes.

Hispanica Varieties

SPIRÆA (The Meadow Sweet), for Forcing or Planting Out.

The large graceful feathery pure white fragrant flowers of *Spiræa japonica*, *compacta multiflora*, and *Astilboides* are most valuable for furnishing vases, while the plants are amongst the most decorative for the greenhouse and sitting-room. In forcing, a moist atmosphere and abundance of water at the roots are necessary. The pots therefore should be stood in saucers of water. *Spiræa palmata* and its varieties are very beautiful. In shady or moist borders out of doors, and at the margin of streams and ponds, the *Spiræas* are all very decorative plants.

As The *Spiræas* we offer are all good clumps. each—s. d.

japonica (*syn. Astilbe japonica*), white, ht. 2 ft. strong clumps, per doz. 5/- 0 6

× **tuberosum**, flowers yellow and red, very showy; plant in Spring and lift in Autumn. The dried tubers are eaten by the natives of Peru, and in Bolivia they are boiled and then frozen, being much esteemed as a delicacyper doz. 2/6 0 3

× **TUBEROSE**. This valuable sweet-scented flower is too well known to need description. For early flowering pot the bulbs as soon as received, and plunge the pots in a temperature of about 60 degrees. The bulbs for succession keep dry, or pot at once to make root growth; in either case the temperature should not be below 50 degrees, or the bulbs will suffer.

Double American Dwarf, "**Excelsior Pearl**," the finest strain, having large pure white double flowers of delicious fragrance. Orders booked for supply from January to May. Extra strong bulbs (6 to 7 in. in circumference), per 100, 15/-; per doz. 2/3 0 3

Barr's Lawn Grasses for September Sowing.

Lawns should be renovated in September, after the wear and tear of Summer, sowing at the rate of 1 lb. per 100 square yards. Barr's Thames Emhankment Mixture, 1/- per lb.; Barr's Standard Mixture for fine Lawns, 1/8 per lb.; Barr's Dwarf Mixture for extra fine Lawns, 2/3 per lb. Leaflet, with full particulars and many hints on the management of Lawns, sent on application.

BARR'S FAMOUS TULIPS.

Awarded Six Gold Medals by the Royal National Tulip Society, and many other high Awards at the London Spring Flower Shows. Awarded on May 20th, 1908, the Royal Botanic Society's Gold Medal.

Tulips are extremely hardy, and of easy culture, flowering freely in either sunny or shady situations, and developing their handsome showy flowers even in a confined town garden. By a judicious selection of Single, Double, and May-flowering Tulips, a most brilliant display of colours may be maintained in the garden from early April to end of May. In gardens where the flower beds must be kept gay from the earliest dawn of Spring, plant between the Tulips, *Scilla sibirica*, *Chionodoxas*, *Snowdrops*, and *Crocuses*; these flower first, and when out of bloom the leaves form a charming green groundwork for the blossoms of the Tulip. Our **large breadths of Tulips** at the **Surbiton Nurseries** in Spring create much comment, and elicit the greatest admiration from all who see them. See *Illustration on back cover*.

BARR'S EARLY SINGLE TULIPS.

Bulbs of Extra Quality.

Those alone who have massed the different varieties of **Single Tulips** (*planting the bulbs 4 inches apart*) can form an idea of their great beauty and rich diversity in shade and colour, and the grand effect they produce grouped in flower beds or borders. The **Single Tulip** is extensively grown for indoor decoration (three or five bulbs in a pot) and *cultivated in the same way as the Hyacinth* for early flowering and succession.

The varieties of the little early **Duc Van Thol Tulips** (with exception of the *scarlet, edged yellow variety*, which flowers first) bloom together, and are of the same height, which renders them valuable for beds and borders, where a very early Spring display is required, also for early forcing with the Roman Hyacinth, etc.

Hints as to the arrangement of Early Tulips in beds, etc.—A difficulty is often experienced by Amateurs in knowing what kind of Tulips to select to bed together, seeing that they are not all the same height, and that some are earlier in flower than others. For the assistance, therefore, of purchasers we have taken special observations at our Nurseries as to the heights and the order in which the **Early Single** and **Double Tulips** flower.

Soil and Time of Planting.—Any ordinary garden soil enriched with old stable manure, with a sprinkling of quicklime dug in while fresh, suits the Tulip. Planting out of doors should take place from *October to November*, not earlier. The bulbs should be planted with their tops 4 in. deep.

Arrangement of Colours in Bedding.—The following varieties if bedded together produce charming effects: *Princess Marianne*, *Ophir d'Or* and *Wouverman*; *Pottebakker White* and *Chrysolora*; *Prince of Austria*, *President Lincoln* and *Chrysolora*; *Rose Grisdelin* and *Princess Marianne*; *Pottebakker Yellow* and *Thomas Moore*; *Chrysolora* and *Dusart*; *Princess Ida* and *Rosamundi*; *Duchesse de Parma* and *Fabiola*; *Rosamundi* and *Rose Superbe*; *Couleur Cardinal* makes a grand show bedded by itself, but *Snowdrift* goes well with it; *Keizerskroon* makes a fine bed with *Queen Victoria* as an outside border. *Golden Queen* is a grand bedder.

Time of Flowering.—The order of flowering is indicated by (1), (2), (3), (4), or (5) after the name. It will be noticed that the **Double Tulips** generally are a little later-flowering than the Singles. The difference in time of flowering between each number is not great, so that (1) and (2) may be bedded together, also (2) and (3), and so on. The varieties of **Duc Van Thol** are not numbered, as they flower before any of the others.

Varieties Suitable for Forcing.—The following varieties only should be used for this purpose:

(1) To bloom at **Christmas and early January.**—*Duc Van Thol* varieties, *Mon Trésor*, *Pottebakker White*, *Proserpine*, and *Vermilion Brilliant*.

(2) To bloom from **end of January to early March.**—*Duchesse de Parma*, *Joost Van Vondel*, *La Belle Alliance*, *Pottebakker White*, *Primrose Queen*, *Prince of Austria*, *Queen Victoria (La Reine)*, *Rose Grisdelin*, *Thomas Moore*, *Vermilion Brilliant*, and *Yellow Prince*.

(3) For later forcing, to come in **from middle of March to early April.**—*Couleur Cardinal*, *Duchesse de Parma*, *Joost Van Vondel*, *Keizerskroon*, *La Belle Alliance*, *Pottebakker White*, *Pottebakker Yellow*, *Prince of Austria*, *Prince de Ligne*, *Rosamundi*, *Rose Grisdelin*, *Rose Luisante*, *Rose Superbe*, *Vermilion Brilliant*, *White Swan*, and *White Hawk*.

☞ For general directions for treatment of bulbs in pots, see page 1.

Annuals for Autumn Sowing.

Special List of Hardy Annuals suitable for September sowing in the open for early Spring display sent on application.

BARR'S DOUBLE TULIPS. Bulbs of Extra Quality.

Plant from October to November.

Double Tulips have massive flowers of brilliant and beautifully diversified colours, and are very effective in beds on lawns, terraces, etc., also as edgings to beds of Roses and Rhododendrons and to shrub-beries. Planted in groups of five or more, they are very attractive. *Plant the bulbs four inches deep and four to six inches apart.*

Time of Flowering.—The numbers in brackets after the name indicate the order of flowering, and will assist amateurs in making their selections for bedding, thus:—(1) corresponds in time of flowering with (1) of the **Single Tulips**; (2) corresponds with (2) of the **Single Tulips**, and so on. The heights, as registered at our Nurseries, are given in inches. By a judicious selection of Double and Single Tulips, a display of brilliant colours may be maintained in the garden for a long period.

Double Tulips should be planted three bulbs in a pot, and receive the cultural treatment recommended on page 1.

DOUBLE TULIPS SUITABLE FOR FORCING.

To force for earliest decoration, say **January**, *Salvator Rosa* may be used ; the other varieties do not force successfully so early.

For decoration from the **end of January to early March** we can recommend the following sorts:—*Couronne d'Or, El Toreador, Imperator Rubrorum, Lady Palmerston, Murillo, Princess Beatrice, Tournesol, Tournesol Yellow, and Titian.*

For late forcing, to produce blooms from **end of March to early April** the following kinds should be grown:—*Couronne d'Or*, *Imperator Rubrorum*, *La Candeur*, *Le Matador*, *Murillo*, *Tournesol*, and *Tournesol Yellow*.

PARROT, or DRAGON TULIPS, with Lacinated Petals

(May-flowering).

These Parrot, or Dragon Tulips, have large characteristic blossoms with curiously lacinated petals, and richly varied shades of beautiful colours in the same flower. They are very remarkable and exceedingly showy and effective in flower borders, while if grown in hanging baskets the drooping flowers look like orchids. In height they average about 15 inches, and bloom with the *Cottage* and *Darwin* Tulips.

The following are all selected extra strong bulbs, superior to what are often sold, and may reasonably be expected to bloom; but as in some seasons the Parrot Tulips are rather shy in flowering, to ensure a good display in flower beds and borders it is wise to plant the bulbs only 4 inches apart.

12 bulbs each of 6 beautiful varieties, 7s. 6d.; 6 each, 4s.

	per doz.—s.		d.			per doz.—s.		d.
Amiral de Constantinople , glossy scarlet, shaded and tipped orange, showy	per 100, 7/6		1	3	Crimson Beauty , rich deep blood-crimson, with blackish markings, flowers of immense size and very handsome; this variety should be largely used in beds, borders, and baskets, as nearly every bulb flowers freely and produces a most brilliant effect. BARR'S

Beautiful “Cottage” Tulips and Tulip Species

(All Single and mostly May-Flowering).

Extract from the "Gardener's Chronicle," May 30th, 1908: "Messrs. BARR & SONS had a very extensive and comprehensive group which included choice alpine and herbaceous plants and perhaps one of the **most gorgeous displays of Tulips ever seen at a Temple Show.**"

See Illustration on back cover of Catalogue.

The name **Cottage Tulips** we have given to the various beautiful May-flowering Tulips which have mostly been found growing in old cottage gardens in England, Scotland, and Ireland, where they have been in some cases for over fifty years. Some have also been traced to old French gardens. They are all very beautiful, presenting a great variety in form and colouring, and having none of the stiffness of other Tulips. On account of their extreme hardness they are specially adapted for permanent hardy flower borders, where they should be freely planted in large clumps and masses. They may also be naturalised in grass, wild gardens, etc., where during May they present a charming picture. Those who have visited **Kew Gardens** in Spring will have noticed these Tulips planted freely in grass, and also used largely in *filling flower beds* on the lawns.

The bulbs should be planted six inches deep on heavy soils, and nine inches deep on light soils.

For cutting, the flowers of these "Cottage" Tulips are highly prized, as the flowers are of elegant outline and have long stems; a free and graceful effect can be readily obtained by their use.

In most cases we give the heights as registered at our **Surbiton Nurseries**, but these will vary somewhat according to richness or poverty of soil.

Time of Flowering.—The Cottage Tulips take up the succession of flowering as the Early Single and Double Tulips are going out of bloom. As far as possible we have indicated the order of flowering by (1), (2), and so on. (1) will correspond in time of flowering with (5) of the Early Single and Double Tulips. The Parrot Tulips bloom together with those marked (2), and the Darwin with those marked (3) and (4) in the following lists.

☞ Those Tulips marked Φ are species, and gems for sunny sheltered nooks in the rock garden, where their lovely flowers will delight the eyes of all who see them. They should be planted 3 to 6 inches deep in light sandy well-drained soil.

BARR'S GRAND DARWIN TULIPS

All Single and May-flowering

As grown at our Surbiton Nurseries, and exhibited at the London May Flower Shows, where their grand stately flowers elicit the admiration of all. On May, 20th, 1908 our exhibit of these was awarded the Royal Botanic Society's **Gold Medal**.

See Illustration on back cover.

For flower beds and borders we confidently recommend the following **Darwin Tulips** for their stately bearing and rich colours. They have been specially selected as being distinct, showy, and beautiful, so that buyers need have no hesitation in choosing the colours they require, as all are good. The cut flowers form an elegant decoration for vases, and last a long time in water. The lighter lilac and heliotrope coloured varieties blend charmingly with yellow "Cottage" Tulips such as *Mrs. Moon*, *Vitellina*, *Gesneriana lutea* and *lutea pallida*, *flava*, *Yellow Queen*, etc.

DARWIN MAY-FLOWERING TULIPS—*continued*.

By gentle forcing in pots these grand Tulips may be had in bloom by March, and will be found of great value for indoor decoration on account of their lovely soft colours and tall stately bearing. The centres of many are most beautifully marked.

In most cases we give the heights as registered at our Nurseries last Spring, also the order of flowering in relation to the flowering period of the **Cottage Tulips**, (1) being the first to open and (5) the latest.

BARR'S EXTRA CHOICE MIXTURE of Darwin Tulips , in various brilliant colours, producing a grand effect when grouped in the herbaceous border or filling beds on lawns, etc.; their stately bearing and rich self colours will be greatly appreciated. These make a grand show when massed in flower beds or borders, and we can confidently recommend them to all.		per 1000, 60/-	6	6...1 0... —
BARR'S FINE MIXED Darwin Tulips , containing a good variety of colours and suitable for massing in wild gardens, etc.		per 1000, 45/-	5	0...0 10... —

REMBRANDT TULIPS (May-flowering).

These are Darwin Tulips which have broken into a permanent variegation. The flowers are beautifully striped and blotched, and remarkably attractive in flower beds and borders. They range in height from 18 in. to 25 in.

Barr's Beautiful Mixture of Rembrandt Tulips per 100, 15/-; per doz. 2/3

REMBRANDT TULIP "Antique," white heavily flamed lilac, and glossy purple, very pretty, ht. 20 in. per 100, 25/-; per doz. 3/6; each 4d.

BARR'S "GOLD MEDAL" ENGLISH FLORIST TULIPS.

Awarded Six Gold Medals by the Royal National Tulip Society.

These beautiful May-flowering English Tulips have been prized by all lovers of the true Florist's Flower for over a century, although of late years the number of growers has diminished. The flowers are of perfect goblet form, and their beautiful and symmetrical markings quite unique.

CULTURE OF ENGLISH TULIPS.—Any good loamy garden soil suits the "English Tulip." The bulbs should be planted four inches deep and four inches apart, from the end of October to early in November, choosing a day when the ground is in nice friable condition; avoid planting when the ground is wet.

HINTS TO EXHIBITORS AND TULIP AMATEURS.—As the English Tulip often suffers much from hail and wind during Spring, it is a good plan, when choice named sorts are grown, to erect over the bed a skeleton framework on which a covering of calico or white canvas is fastened in February or March, leaving the sides open till the buds show colour, when the covering may be brought down over the sides

too. By this means hail, rain, and very hot drying sun are kept off, and the flowers open in all their purity, while the period of flowering is prolonged by some weeks.

✂ To those who wish to know all about the **English Tulip**, we recommend "**The English Tulip**," a little pamphlet containing the lectures delivered on this flower at the great Tulip Conference of the Royal National Tulip Society, held at *Royal Botanic Society's Gardens*, May 12th, 1897, price 1s.

25 in 25	Beautiful Varieties, Bizarres, Byblæmen, and Roses ...	10/6, 15/-, 21/-, & 42/-
12 in 12	" "	3/6, 5/6, 7/6, 12/6, &

In the above collections the **Bizarres** embrace the following colours,—self shades of red, crimson, scarlet, maroon, and chestnut ; also flakings of orange, scarlet, crimson, brown, and black, on a lemon or golden-yellow ground. The **Byblæmens** are made up of self shades of purple, violet, lilac, and heliotrope, all with a dazzling white centre ; also beautiful flakings of black, violet, purple, and lavender, on a clear white ground. The **Roses** contain lovely self shades of rose and rose-scarlet ; also pretty flakings of delicate pink, soft rose, glowing scarlet, and deep crimson on a pure white ground.

Barr's Choice Mixture of Beautiful English Florist Tulips, in great variety, comprising Bizarres, Byblømens, and Roses. When massed in quantity in beds and borders these beautiful Tulips present a brilliant picture, resembling a richly coloured Persian carpet

per 1000, 95/-; per 100, 10/6; per doz. 1/6

 A full descriptive list of English Florist Tulips can be had on application.

VALLOTA purpurea (The Scarborough Lily), a most valuable Autumn-flowering cool greenhouse plant, producing on stout stems umbels of 5 or more large brilliant scarlet flowers which open in succession, thus remaining decorative a long time. It may be planted out of doors in May, and when in bud put up for greenhouse or sitting-room decoration.

Established in pots, per doz. 21/-, 28/- & 36/-; each 2/-, 2/6 & 3/6

× **WATSONIA**, very ornamental and showy bulbous plants, which may be grown in pots for the cool greenhouse or be planted outdoors in a warm sunny situation, plenty of water being given while in growth.

WATSONIA—continued..

each—s. d

Ardernei, a most lovely plant for pots in cool greenhouse, or for sunny warm situations out of doors; in summer it throws up elegant branching spikes 3 to 4 ft. high, with very elegant glistening snowy white flowers of great substance. If the top spike is removed when the flowers are fading the buds on the lower spikes rapidly develop, and a decoration is thus maintained for two months. The plants must be supplied with abundance of water while in growth and flowering

Monster bulbs (expected from South Africa in March), per doz. 12/- & 18/-; each 1/3 & 1/8
coccinea, bearing in Summer handsome spikes of bloom of a gorgeous vermilion colour, on a reddish brown stem, ht. 1 ft.per 100, 15/-; per doz. 2/3

WINTER ACONITE (*Eranthis hyemalis*), its golden blossoms early in Spring are very beautiful, resting on emerald green cushions of leaves, produce a charming effect in February especially when associated with Snowdrops, Early Scillas, Chionodoxas, Anemone fulgens, Anemone apennina, etc. **Under trees and in moist situations**, where few other plants will thrive, the **Winter Aconite** luxuriates, and densely clothes the ground with its bright green foliage long after the flowers have disappeared. It is a good useful plant to naturalise in grass, etc.per 1000, 15/6; per 100, 1/8

Extra strong roots ...

New Species from Asia Minor (*Eranthis cilicica*), very distinct from the old **Winter Aconite**, having larger flowers with bronzy and more finely cut foliage, and blooming later.....per 1000, 50/-; per 100, 5/6; per doz. -/10

WOOD HYACINTHS. See Scilla, page 71.

× **ZEPHYRANTHES** (*syn. Amaryllis*). These **Swamp Lilies** are a beautiful family of bulbous plants; all except **Candida** requiring greenhouse culture, or they may be grown in a sunny well-drained situation against a south wall in a deep loamy soil; as pot-plants (several bulbs in a pot) they are charming.

Andersoni (*syn. Habranthus*)—the **Golden Zephyr Flower**—bearing in late summer handsome little brownish red flowers with golden interior, ht. $\frac{1}{2}$ ft., per 100, 5/6; per doz. 10d.

atamasco, bearing from August to September large pure white flowers, nearly 3 in. long and $2\frac{1}{2}$ in. across, with yellow stamens, ht. $\frac{3}{4}$ ft.per doz. 5/6

candida (The Flower of the West Wind), a fine hardy bulb producing a profusion of white Crocus-like flowers in Autumn, ht. 8 in.; valuable for edgings, masses, etc.

per 1000, 35/-; per 100, 4/-; per doz. -/7

carinata, large handsome flowers measuring 3 inches across, of a beautiful delicate rose colour, ht. 8 in., late Summer-flowering

rosea, a charming little species, bearing from August to September flowers of a soft bright rose with golden anthers, ht. 6 in.per doz. 4/6

verecunda, rosy white flowers from Aug. to Sept., ht. $\frac{1}{2}$ ft.Croc failed.

BARR'S SELECT LIST OF STRAWBERRIES.

Well-rooted Runners, supplied from August. Less quantities than 50 are charged at a little higher rate.

EARLY.

	per 100—s.	d.
Royal Sovereign , a grand variety both for forcing and open-air culture, bearing very large handsome conical-shaped fruit of luscious flavour, flesh firm and white, continuous cropper ...	3	6
Vicomtesse Héricart de Thury , a great and continuous cropper, fruit of medium size, rich in flavour, and valuable for preserving, a good early forcer	4	6

FOR MAIN CROP.

Bedford Champion , bearing very large handsome fruit with refreshing flavour, a robust grower	8	6
British Queen , very large, of exquisite flavour, requires good cultivation in heavy soil	6	6
Countess , very handsome dark crimson fruit of extra fine flavour, moderate cropper.....	6	6
Dr. Hogg , large and handsome, one of the best flavoured Strawberries in cultivation, requires good culture and likes a heavy soil	6	6
Fillbasket (Laxton's), handsome bright-red pointed fruit of fine flavour, free bearer	6	6
Kitley's Goliath , a grand successional bearer, fruit with tender flesh of fine sugary pine flavour	4	6
Louis Gauthier , a fine new variety, producing an enormous crop of pale pink fruit of pleasant pine flavour; the new runners, if stopped beyond the first stolon and left undisturbed, produce a second crop of fruit in autumn	6	6
President , large and handsome, of richest pine flavour, heavy cropper, and valuable for general garden and main crop forcing; it retains its flavour and carries well	5	6
Reward (new), one of the best main crop varieties, resembling rather British Queen , with very large wedge-shaped fruit, of firm flesh and bright colour	6	6
Sir Joseph Paxton , handsome solid fruit of delicate flavour, very prolific, a favourite market variety, as it is hardy and travels well	3	0
The Bedford , bearing a good crop of handsome round fruit of finest flavour	8	6

LATE.

Filbert Pine , a fine late variety producing a heavy crop of orange-red fruit, of rich brisk flavour; a robust grower, and good for light soils.....	4	6
Givon's Late Prolific , the finest late Strawberry, bearing a heavy crop of very large dark red fruit, firm and of rich brisk flavour	6	6

STRAWBERRIES—continued.

VERY LATE.

	per 100—s.	d
Eleanor , a fine free-growing large variety, producing enormous successional crops	4	6
Waterloo , very large dark fruit, conical in shape, valuable for dessert; it carries well, and may be forced as a last crop	6	6
Laxton's Latest , a grand variety with enormous fruit of a fine deep crimson, after Waterloo but having a richer pine flavour	8	6
President Loubet (new) , a seedling from Waterloo with very large fruit of rich pine flavour.....	8	6

Strawberry Plants in Small Pots.

To fruit first season outdoors or for shifting into large pots for forcing ...per 100, 17/6; per doz. 2/6

TRUE ALPINE AUTUMNAL STRAWBERRIES. Well-rooted Runners.

In growing these for Autumn cropping, remove the Spring blossoms in order to induce the plants to make runners, as these last produce the best fruit. *We enumerate three of the best varieties.*

	per 100—s.	d
Belle de Meaux , producing large red berries of rich flavour	4	0
Bergeri , fruit rich crimson, free bearer	4	0
Millet (new) , a fine variety, the fruit measuring up to 2½ in. long, vigorous grower	5	6

NEW HYBRID PERPETUAL-FRUITING STRAWBERRIES.

These valuable hybrid Strawberries commence fruiting in Summer, and continue producing until frost sets in. If grown in pots and removed indoors early in September the plants fruit freely till late in Autumn. Feed the plants freely during dry weather.

	per 100—s.	d
St. Antoine de Padoue , the <i>largest fruited</i> of these hybrid strawberries, bearing globular bright red fruit of fine flavour; the most vigorous grower. AWARD OF MERIT R.H.S.	5	6
Saint Joseph , a <i>most productive</i> variety, fruit of medium size, flesh red, very sweet and melting and rich in flavour. AWARD OF MERIT R.H.S.....	5	6

USEFUL TOOLS FOR BULB PLANTING, Etc.

Barr's Special Bulb Planter (Regd. 368338) specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf, which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have

Rd. 368338

BARR'S BULB PLANTER.

been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early Autumn rains, and not when in a hard and baked condition, as it is then impossible to use this, or indeed any other, tool with success. By the use of

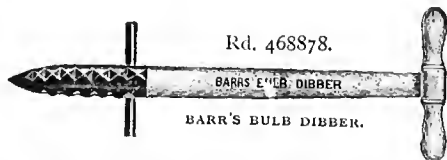

Barr's SPECIAL BULB PLANTER a large quantity of bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup :—To cut out a circular hole 2 inches diameter

" " " 2¼ " " } 10/6 each.
 " " " 2½ " "

We shall send the medium size (2¼ in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber (Regd. 468878), specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6¼ lbs., length 36 inches over all. 9/6 each.

Rd. 468878.

BARR'S BULB DIBBER.

Barr's Special Bulb Trowel, made of best steel,

specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 2/9 each.

New Pattern Daffodil Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring when Daffodils are just showing; also a useful weeding tool. With 3 ft. handle (41 inches over all, and weight under 1 lb.), 1/9 each, with short handle (12½ inches), 1/3 each.

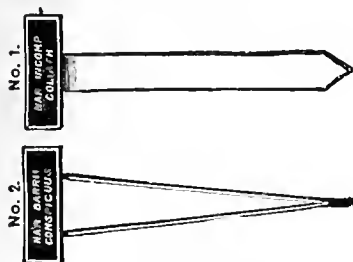

Garden Trowel, solid cast steel, finest quality, 5 in., 1/2; 6 in., 1/3; 7 in., 1/6 each.

SET OF LADIES' GARDEN TOOLS (best quality), CONTAINING :—

Solid cast steel Spade, 5½ in. by 9 in.; cast steel Fork, 4 pronged; light American-pattern Rake, 8 teeth, well-handled; Draw Hoe, cast steel, well-handled, 6 in.; 12/6 per set.

For a fuller list of Tools and other Garden Requisites, see **Barr's Seed Guide**, free on application.

„ **Wire Supports** (brass), 4/6 per doz.

MANURES, SOILS, COCOA FIBRE, etc.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. **For Pots**, mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. 2-lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/-.

Basic Slag, per cwt. 10/6; per 7 lb. 1/-.

Bone Meal (*Genuine fine Crushed Bones*), best quality, per cwt. 14/-; per 7 lb. 1/3.

Sulphate of Potash, per cwt. 21/-; per 7 lb. 1/9.

Clay's Fertiliser, a well-known effective manure, confidently recommended. Tins 6d., 1/-, and 2/6 each; in bags, 7 lb., 2/6; 14 lb., 4/6; 28 lb., 7/6; ½-cwt., 12/-; 1 cwt., 20/-.

Ichthemic Guano, 7 lb., 2/6; 14 lb., 4/6; 28 lb., 7/6; 56 lb., 12/6; 1 cwt., 20/- (*bags free*). Sample tins, 6d. and 1/-.

Standen's Gardeners' and Amateurs' Manure, in tins, 6d., 1/-, 2/6 and 5/6; in bags, 28 lb., 10/6; 56 lb., 18/-; 1 cwt., 32/-.

Thomson's Vine and Plant Manure, 1 lb., 1/-; 3 lb., 2/-; 7 lb., 3/6; per ¼-cwt., 6/-; ½-cwt., 10/-; 1 cwt. 20/-.

Barr's Specially Prepared Fertilised Fibre, Shell, and Charcoal Mixture for growing Bulbs in Bowls, Jardinets, Glasses, etc. Specially recommended for Hyacinths grown in glasses: fill the glasses with the preparation, and add water till no more can be absorbed. Place the bulb so as to rest the base on the preparation, and tie it down with brown paper, leaving an opening in the centre of the paper for the shoot. When the bulb has well rooted the paper may be removed; care must be taken that the material in the glass is kept wet. The same remarks apply to bulbs grown in bowls, etc.: they must be kept in place till they have rooted. 3/6 per bushel; 1/- per peck.

Jadoo Fibre, cleanly to use, very light, for growing plants and bulbs in hanging baskets, jardinets, etc. *Full particulars on application*. Per peck, 1/-; per bushel, 3/6; per 3 bushels, 8/-.

Loam, Peat, Leaf Soil, Silver Sand, each, per bushel, 2/6.

Barr's Specially Prepared Potting Soil, containing a suitable quantity of *Phytobroma*, per bushel, 2/6.

Cocoa Fibre, superior quality, one bushel, 1/6; 3 bushels for 3/6 (*bags free*).

Small Pebbles and Charcoal, suitable for growing Hyacinths, etc., in bowls and vases without drainage, 6d. per quart; 3/6 per peck.

For a fuller List of Garden Requisites, see **BARR'S SEED GUIDE**, free on application.

Special Notices and Terms of Business.

FREE CARRIAGE OF BULBS.

All Orders for Bulbs to value £1 and upwards sent Carriage Paid to any Railway Station in the United Kingdom.

Prepaid Orders for Bulbs to value 10s. and upwards sent Carriage Paid to any Railway Station in the United Kingdom.

5% Cash Discount on Bulb Orders of 20s. and upwards.—1s. in the £ discount is allowed for Cash with Order (*with the exception of the special Collections offered on pages 3 and 4, which are strictly nett*), and this may be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order. The same discount may also be deducted from all Bulb Accounts of 20s. and upwards when paid within 14 days from date of invoice (*excepting Collections offered on pages 3 and 4, which are strictly nett*).

Terms of Credit.—Our books are made up at Christmas and Midsummer, when all accounts are due nett.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "London and County Bank." Small amounts may be remitted in Postage Stamps or Coin, in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.*

Catalogues.—Our Seed Guide is published in January, Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting in January, Hardy Plant Catalogue 1st of March, Daffodil and General Bulb Catalogues in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Our Surbiton Nurseries.—Visitors are invited during Spring to see our magnificent Collections of Daffodils and Tulips in bloom. The Nurseries are situated less than a mile from Surbiton Station on the London and South-Western Railway. Cabs are always to be had at Surbiton Station.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

Notices to our Foreign and Colonial Correspondents.

Prepayment necessary.—Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an "order to pay" on a London Bank, or Agent*; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Cash Discount 5%.—In the case of Prepaid Orders to value 20s. and upwards we allow a discount of 1s. in the £ from the amount of Bulbs or Seeds ordered, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the order.

Carriage.—No allowance for Carriage can be made in the case of Foreign Orders; the extra attention necessary precludes any kind of allowance in this respect.

Packing.—A moderate charge will be made where special materials have to be used, such as Sphagnum Moss, Oil-silk, or hermetically sealed tin cases, and where any special packing necessitates a great deal of labour (as in the case of some Plant Orders), when out-of-pocket expenses only will be charged.

Parcel Post Rates.—AUSTRALIAN COMMONWEALTH (*P. & O. and Orient Lines direct*): 6d. per lb. (1s. for the first lb.). *Via Italy* (journey 6 days shorter): not exceeding 1 lb., 2s.; every additional lb. 6d.

NEW ZEALAND: under 3 lb. 1s.; 7 lb. 2s.; 11 lb. 3s.

TASMANIA: 6d. per lb. (minimum charge 1s.).

CAPE COLONY and NATAL: 9d. per lb. TRANSVAAL: 1s. per lb.

INDIA (*P. & O. Line direct*): Under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s. *Via Italy* (journey a week shorter): Under 3 lb., 2s.; under 7 lb., 3s.; under 11 lb., 4s.

CANADA: 6d. per lb. (8d. for the first lb.).

JAPAN (*via Canada*, 26 days to Yokohama): Under 3 lb., 2s.; under 7 lb., 3s.; 11 lb., 4s.

CHINA (*via P. & O. Line direct*): Under 3 lb., 1s.; under 7 lb., 2s.; under 11 lb., 3s. *Via Italy* (journey one week shorter): Under 3 lb., 2s.; under 7 lb., 3s.; under 11 lb., 4s.

UNITED STATES of America. By *Official Service* to all places in U.S.A. Under 3 lb., 1s. 6d.; under 7 lb., 2s. 6d.; under 9 lb., 3s. 6d.; under 11 lb., 4s. 6d.

Shipping, etc.—In Shipping Bulbs and Plants to Australia, New Zealand, America, India, and the Cape, we exercise great care in selecting, preparing, and properly packing the same. Still there are so many contingencies that we cannot, in any way, hold ourselves responsible for the condition in which Plants or Bulbs reach their destination. *Our Customers will confer a favour if they report, on arrival, the condition of the goods.* Our experience in *successfully preparing and shipping Seeds, Bulbs, and Plants* to India and the Colonies extends over a long period.
